Address: 2582 E. Table Rock Rd.
Boise ID, 83712

Name of Utility Company: Idaho Power
Acknowledge public record: True

Comment: I urge the PUC to thoroughly investigate the request by Idaho Power to increase its coal capacity. Idaho Power has done much to squelch wind and solar development and generation for potentially unethical reasons that have nothing to do with income and profits. They realize they are a monopoly and their incentive is not profit because it is guaranteed. Their incentives are known only to them. So please be cautious and diligent and have a high level of confidence that you are placing the welfare of the citizen customers of Idaho Power ahead of all else. Thank you.

Victor ID, 83455

Name of Utility Company: Fall River Electric Acknowledge public record: True

Comment: This expenditure is just the tip of the iceberg as it will cost hundreds of millions of more dollars to keep these aging coal plants in compliance with pending regulations. Idaho Power should be investing in Idaho's renewable energy future and energy efficiency.

Name of Utility Company: idaho power
Acknowledge public record: True

Comment: I support idaho power seeking clean energy through solar, wind and ocean wave technology and am against any use of coal fire plants as they pollute our air and are a waste of earth's non renewable resources. Please keep our air and water clean for our children and future.

Name of Utility Company: Idaho Power
Acknowledge public record: True

Comment: Idaho Power should be phasing out the use of coal and phasing in the use of wind and solar power. It seems that Idaho Power is behind the time when it comes to the environment and global warming.

Comment: I disagree with "locking in" \$130 million for coal plant upgrades. I would rather see Idaho Power make a real commitment to renewables since Idaho has sufficient resources for such development. We need to move on and away from coal pollution.
