Boise Idaho, 83709

Name of Utility Company: Idaho Power Company Acknowledge public record: True

Comment: Dear Commissioners and Staff,

This is an interesting case. A technical hearing I believe would be helpful. A public hearing might not be needed.

Solar generation is uniquely suited for Idaho because all of its generation happens during peak hour uses during the peak season. Long term it is likely solar generation will provide most of the electricity generation in the world because it is the most economical form of new generation.

Please consider encouraging Idaho Power Company to install pilot storage projects. The price of utility size storage is following the same price drop that solar PV has experienced.

Thank you.
