Name of Utility Company: Idaho Power
Acknowledge public record: False

Comment: Dear Members of the Public Utilities Commission:

I strongly support the power purchase agreement that Idaho Power Company has entered into with the Grandview Solar Project. The project should definitely be built.

This will be the first utility scale solar project in Idaho and I hope that it is but the first step in a long journey. Southern Idaho could be the Saudi Arabia of solar energy, producing vast quantities of electricity and selling it to other states, particularly the cloudy parts of the Pacific Northwest. This will bring money back into Idaho, create Idaho jobs, and increase property tax revenues. But first we must take the first step and build the first plant.

The Grandview project will bring all these benefits to Idaho--up to 300 temporary construction jobs, full time maintenance jobs, it will pay lease payments to landowners, and will pay approximately \$400,000 per year in property taxes to Elmore County.

The project is also good for the environment, producing electricity equivalent to that consumed by 20,000 households without any emissions.

Finally, this looks like some of the cheapest power that Idaho Power can currently buy, so it is good for the consumer.

In short, this project is good for the environment, good for the economy, good for the consumer, and good for Idaho Power--a win win win win. I urge that it be approved.

Re: Idaho Power -- Energy Sales Agreement with Grand View PV Solar Two, LLC, IPC-E-14-19.

Dear Commissioners:

The Grand View Solar Project is good for Idaho and good for the future of all generations. I support this project and I hope you will too. Thank you for your attention to the environment, job creation, and a progressive alternative energy solution.
