Subject: Comment to Idaho Public Utilities Commission RE: Site Based Energy/Idaho Power

Dear Ms. Jewell, please accept this email as a formal comment to be directed to the Commissioners.

Idaho needs more affordable, clean, renewable energy alternatives, and I am in full support of making more electricity available to consumers from solar sources. I would ask that you do everything in your power to make it easier for individuals and entities to establish solar energy facilities. I find it appalling that Idaho Power time and again seeks only to make more money for its corporation, and in doing so does a disservice to its customers, the people of Idaho, and the environment of this beautiful state.

I urge you to deny Idaho Power's request concerning Site Based Energy's project near Bellevue, and see Idaho Power's tactics for what they are, yet another attempt of Idaho Power to limit affordable, alternative, clean, renewable energy sources for Idahoans.

Thank you,

Monica Brown

Dear Sir:

I am a Hailey Idaho resident of many years and therefore a customer of Idaho Power. I am also a citizen of this earth and at this time in History we need to do whatever is necessary to get renewable energy going, however big or small. So I ask you, please do what ever you have to, to allow this project to move forward!

Respectfully Submitted
