Boise Idaho, 83703

Name of Utility Company: Idaho Power

Comment: I am encouraged by Idaho Power's plan to begin weaning itself from coal and beginning to see the light shining on solar power. I think Idaho Power should embrace all methods of solar electricity generation including small rooftop units as well as large-scale solar plants. The Boardman-Hemingway line does make some sense if it brings wind generated power to Idaho from Washington and Oregon.

We in Idaho enjoy a majority of sunny days, most of those in the summer when electricity demand is greatest. It only makes sense to utilize the sun to the maximum extent for power generation.

Thank you for allowing me to comment on this important issue, Tim
