Name of Utility Company: Idaho Power

Comment: I am concerned about the proposed changes for net metering customers. We are considering solar panels to increase electricity for the grid, and reduce our carbon footprint. Creating a separate rate class is not necessary for collecting data, yet it has immediate negative impacts on businesses and homeowners. We will ask that the PUC not approve these discriminatory changes, which the utility is proposing before having an analysis of the costs and benefits of the solar energy that customers put back on the grid.

We feel that their proposal of creating a separate rate schedule now will open up the opportunity for unbridled adjustments in the future as they see fit as it wouldn't be regulated by the residential schedules.
