My power company is Idaho Power

I want you to know that:

- I want to keep solar and wind power **affordable** in Idaho.
- I may want to put solar power on my property in the future.
- I like solar & wind power because they will bring **thousands of jobs** to Idaho.
- I would like to see a **state incentive program** for installation of solar and/or wind.
- Idaho Power should continue to pay for power generated by customers; keep *Schedule 84* that provides net metering.
- Idaho Power should embrace solar power because it reduces the need for power during the day when air conditioners are running the most.
- Idaho should work with their customers to develop strategies to encourage distributed generation, as other power companies do.
- Idaho Power should invest in more renewable energy and divest from fossil fuels.
- Idaho Power should reimburse the cost of a home owner's solar system because they reduce the need for more infrastructure (power lines, power plants, etc.).

Additional Message to Idaho Public Utilities Commission:
