Address: 565 E. Greencreek ct.
Eagle ID, 83616

Name of Utility Company: Idaho Power

Comment: I wanted to voice concern about Idaho Power's changes to Net Metering. It unfairly targets us customer with solar/wind production onsite. The utility is using its size to dictate to Idaho citizen's the direction of clean electricity and our air and water quality.

Cost Increase Proposed by Idaho Power for Customers with Solar or Wind Turbines

Citizen Comment to the Idaho Public Utilities Commission

P O Box 83720 Boise, Idaho 83720-0074; FAX: (208) 334-3762

Case Number: IPC-E-17-13

My power company is Idaho Power Co.

I want you to know that:

- I want to keep solar and wind power affordable in Idaho.
- I may want to put solar power on my property in the future.
- I like solar & wind power because they will bring thousands of jobs to Idaho.
- I would like to see a state incentive program for installation of solar and/or wind.
- Idaho Power should continue to pay for power generated by customers; keep Schedule 84 that provides net metering.
- Idaho Power should embrace solar power because it reduces the need for power during the day when air conditioners are running the most.
- Idaho should work with their customers to develop strategies to encourage distributed generation, as other power companies do.
- Idaho Power should invest in more renewable energy and divest from fossil fuels.
- Idaho Power should reimburse the cost of a home owner's solar system because they reduce the need for more infrastructure (power lines, power plants, etc.).

RECEIVED

OCT 2 2017 9:36 AM

Additional Message to Idaho Public Utilities Commission:

Idaho Power should be required to pay for excess power generated by home owners at 100% of the going rate for their generated power.

Comment: Please Support equal access to the electric grid for all customers, including those with solar or wind power

Idaho Power should add more options for customers to generate and use green energy, not restrict options.

Idaho Power should be fairly compensated for access to the grid by all customers, not just those installing solar

The public needs full information on the benefits of having distributed energy and more solar as well as the costs.

By restricting solar energy production, Idaho Power is leading us even faster into an uninhabitable planet, and that is unconscionable.
