Boise ID, 83702

Name of Utility Company: Idaho Power
Comment: Dear Idaho PUC Commissioners,

I am writing to express concerns about Idaho Power's Net Metering Proposal.

I understand that it is the role of the PUC to protect customers from unreasonable, unfair, and discriminatory rates. It is also my understanding that Idaho Power's Net Metering Proposal requests to do just that – discriminate and unfairly charge solar customers on net metering. A new rate class should not be created for solar, net metering customers.

While I myself do not have solar, I wish my house was a good candidate for it. The more clean energy we can all use, the better our community, state, planet. We should not be penalizing solar customers, we should be rewarding them. How can you or anyone justify subsidizing dirty energy? We should be subsidizing (rewarding) clean energy.

The recent increase in the clean energy business has created many new, high paying jobs around the whole. We (Idaho) should be embracing this and doing everything we can to further the industries.

I hope the Idaho PUC will do the right thing and reward, not penalize, net metering customers. Please deny Idaho Power's proposal for a new rate structure for the net metering customers.

Regards,
Joanie Fauci
