Comment: Please consider renewable energies including solar power from your net metering customers. We like our solar panels and like that we do not use coal. We see evidence of global warming and believe it is important to take care of the earth for the sake of the next generations.

Comment: Idaho is a state rich in potential renewable sources of energy. Please do everything possible to encourage the use of these healthy alternatives rather than discouraging their use as Idaho Power is currently trying to do. Solar energy is the future...embrace and encourage the use of this clean technology.
