Address: 1861 E Raintree Drive, n/a
Boise ID, 83712

Name of Utility Company: Idaho Power
Comment: To Whom it May Concern,

I am writing to urge you to encourage, not discourage, solar and distributed generation. For the reduction in pollution alone it would be morally backwards not to support the transition to solar generation. Please protect net metering and help keep solar affordable in Idaho.

Best regards,
Laura Geraghty

Comment: Eleven intervenors, including Boise City, solar installers, local, and national groups, intervened in the case, arguing that this was completely backwards; that Idaho Power must first establish that this tiny group has a significant, material impact on retail electric rates. In fact, a study by Lawrence Berkeley National Labs indicates that solar net-metering may actually LOWER retail electric rates. So allowing Idaho Power to kill it would be a disservice to customers.
sincerely, Ron Marquart

Comment: Please oppose Idaho Power's attempt to make solar cost prohibitive in Idaho for consumers. Having distributed power not only benefits everyone with clean air but lowers the cost to Idaho Power and their customers by not having to add additional production facilities. Let's make Idaho a innovative energy state!
thanks for considering the public's opinion.
