Comment: This proposed rate increase seeks to recover monies that may be lost when a consumer tries to economize. We've been told for years not to waste power but until now we've never been told that we would be penalized for being good citizens. I urge you to deny this rate increase that makes no sense.

Comment: I am wholly against approval of IPC's request for an FCA increase. Electric service costs in Idaho have grown excessively over the past 15 years, and it is time PUC commissioners start focusing solely on keeping that service affordable.

Comment: First they want us to use less electricity to save the world, then when we do they want to raise our rates. I say with all the new people moving to Idaho the rates don't need to be raised. Idaho Power CO needs to learn how to work leaner. The best reusable power is hydro power, put more of it in.
