8 weeks before it will have transformers available. There are transformers available in the local market for installation tomorrow, but the Company refuses to use any transformers other than those which it procures exclusively from General Electric.

4. I desire to have the system installed in the next 2 days with a competent and licensed electrical contracting company and request an order from the PUC that if I do so, that Utah Power will be required to energize the system.

5. I have personal knowledge of the fact that Ricks College in Rexburg has recently completed the construction of an **entire substation** with outside contractors which Utah Power is agreeing to energize and place into service upon its completion. My installation is certainly much simpler than the construction of a substation.

6. I request an emergency telephone hearing on Wednesday or Thursday, May 28th or 29th, to require Utah Power to energize my system after I get it constructed within this current week.

Further sayeth affiant naught.
