Dear IPUC,

I'm writing to comment on the Pacificorp plan to add five new power projects. I feel the need for additional power plants are needed. As I set here in my air conditioned house.

The problem I have is the idea of using coal and natural gas.

The overwhelming demand for are natural resorces is happening right now. Were depriving are future generations of these wonderful gifts are planet is giving us.

Wind or solar is the only course we can take intell hydrogen can be converted to power. We need natural gas and coal for emergencys. I will creng when I get my power bill when the new tecnolligy enters into my bill. Its for are future so ill get a second job building wind generators.
