Comment_description: This small wind farm is great for Idaho and Pacificorp. This is the first small wind farm in eastern Idaho and please make sure that this is not the last one. This is path towards independence from out of state power plants and fossil fuel power. Please approve this, it is the right thing to do for Idaho.

Comment_description: Idaho is too great a state to continue burning our hydro-carbon resources and destroying our wildlife & recreational landscape with hydro-electric facilities just to produce power. Finally, Idaho residents are learning to harness one of our finest, natural, endlessly renewable resources, the wind. Surely we do not want to send the message to Idaho businesses that we have not joined the 21st Century. Surely we do not wish to send the message that we do not care about our environment. Surely, we do not wish to have these businessmen seek clean, efficient energy sources in another state.

Wake up and help these environmentally friendly pioneers stake their claim in Idaho!

Comment_description: I question why Idaho Power asks for monthly donations for Green Power and then restricts their support to large projects only. I am giving with the hope that Wind Power and Solar Power will find a home through Idaho Power. Do we need an accounting of the Green Power monthly contributions and what they are using the money for? I may take some investment to solve our nations long term energy shortages and I for one have been contributing to the special fund and am will to pay for the development of alternative energy. Idaho Power must be more reasonable in their approach and the PUC recognize the additional costs and allow them to pass along the expense to the users (me).

Comment_description: We need to be promoting everything possible to the expansion of "Green Energy". What better way than WIND ENERGY!! Being a third generation Idahoan, I do know that the wind does blow in Idaho. Lets do everything possible to make it happen. Idaho is a land of opportunities for the individual. Let's continue to "Make Idaho Great!!"

Comment description: I can think of no good reason not to permit privatization and many favorable reasons to permit private individuals to build, own and maintain wind powered equipment. Energy is not plentiful. Production should be encouraged. We don't need monopolies dictating usages and prices.

Comment_description: Incentives need to be offered for the wind energy industry to invest in Idaho. Idaho was secure in obtaining electricity from hydropower but with the current politics involving water and fish, we can no longer blindly think the future will take care of itself.

We need multiple sources of energy: hydro, wind, solar and nuclear. The PUC must have the foresight to plan ahead and promote alternative sources such as the proposed wind projects.

Comment_description: I am in favor of the Schwendiman Wind Project. It will help the local farmer, and have a great economic benefit to the applicable county through increased property taxes and will benefit the State of Idaho as well by additional tax revenue. I encourage the Commission to proceed with approval their contract. I would also encourage the commission not to delay this project and somehow try to associate it with the Idaho Power Co. projects. It is a complete and separate project along with the Power Co. that is participating with the project. Thanks. Armand Eckert.
