On April 23, 2007, PacifiCorp dba Rocky Mountain Power (PacifiCorp; Company) filed an Application with the Idaho Public Utilities Commission (Commission) requesting a change in the Company's PURPA obligations for wind QFs. PacifiCorp proposes restoring the cap on entitlement to published avoided cost rates for wind-powered small power generation facilities that are qualifying facilities (QFs) under Sections 201 and 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA) from the current level of 100 kW to 10 average megawatts per month (10 aMW), subject to the following conditions:

1. Reducing the published avoided cost rates applicable to purchases by PacifiCorp of electric power from wind-powered QFs by \$5.04 per MWh, which amount represents the inflation-adjusted integration costs of that wind power, to be applied against published avoided cost rates except in those circumstances where the QF developer agrees in the power purchase agreement with PacifiCorp to deliver QF output to PacifiCorp on a firm hourly schedule;
2. Removing the requirement that the 90%/110% performance band be applied to purchases from wind-powered QFs;
3. Authorizing PacifiCorp to purchase state-of-the-art wind forecasting services to provide PacifiCorp with forecasted wind conditions in those geographic areas in which wind generation resources are located, provided that QFs will reimburse PacifiCorp for their share of the ongoing cost of the wind forecasting service, in proportion to their percentage share of the wind-generator capability being supplied to PacifiCorp from that area;

4. Requiring QFs to deliver a “mechanical availability guarantee” to PacifiCorp to demonstrate monthly, except for scheduled maintenance and events of force majeure or uncontrollable force, that the QF was physically capable and available to generate a full output during 85% of the hours in a month;
5. . . . (Disaggregation issue – separately noticed)
6. Clarifying that the cap on entitlement to published avoided cost rates shall be restored to 10 aMW only until PacifiCorp’s renewable targets for each calendar year in the most recently acknowledged Integrated Resource Plan are met.

A Notice of Petition in Case No. PAC-E-07-07 was issued on May 15, 2007. A Notice of Discussion Regarding Procedure was issued on June 4, 2007.
