Name of Utility Company: Rocky Mountain Power Add to Mailing List: no

Please describe your question or comment briefly:
I oppose the rate increase that Rocky Mountain Power is proposing of 2.2 % They already charge residential customers an 'effeciency fee'. Why do the customers have to pay for a company to be efficient? Shouldn't they work to improve efficiency for their product? They are making the 'big bucks' from the power rates...they need to be efficient as part of their services. There is no competitor for the customers to choose from. So customers just end up getting 'shafted' on their bill year after year.
