Please describe your question or comment briefly:

This is just another excuse to raise rates and their profits. Why can't the expenses for the energy efficient programs come out of THEIR profits, instead of my pocket? If anything, what can't the 'customers' waiting to participate be charged and NOT the rest of us having to subsidize these programs for the few, especially those of us on a limited income well below the poverty level. Those who use it should pay, not the rest of us. No one helped me finance the changing of all my light bulbs to the low-energy ones. This is just like Falls Water raising their rates for everyone with a meter so we could pay for the installation of meters for those without. We had already paid for our meters. This just is not right.
