

1 Q. Please state your name and business address for  
2 the record.

3 A. My name is Donn English. My business address is  
4 472 W. Washington, Boise, Idaho 83702.

5 Q. By whom are you employed and in what capacity?

6 A. I am employed by the Idaho Public Utilities  
7 Commission as a senior auditor in the Utilities Division.

8 Q. What is your educational and experience  
9 background?

10 A. I graduated from Boise State University in 1998  
11 with a BBA degree in Accounting. Following my graduation,  
12 I accepted a position as a Trust Accountant with a pension  
13 administration, actuarial and consulting firm in Boise. As  
14 a Trust Accountant, my primary duties were to audit the  
15 day-to-day financial transactions of numerous qualified  
16 retirement plans. In 1999, I was promoted to Pension  
17 Administrator. As a Pension Administrator, my  
18 responsibilities included calculating pension and profit  
19 sharing contributions, performing required non-  
20 discrimination testing and filing the annual returns (Form  
21 5500 and attachments). In May of 2001, I became a  
22 designated member of the American Society of Pension  
23 Professionals and Actuaries (ASPPA). I was the first  
24 person in Idaho to receive the Qualified 401(k)  
25 Administrator certification and I am one of approximately

1 ten people in Idaho who have earned the Qualified Pension  
2 Administrator certification. In 2001, I was promoted to a  
3 Pension Consultant, a position I held until 2003 when I  
4 joined the Commission Staff.

5 With the American Society of Pension  
6 Professionals and Actuaries, I served on the Education and  
7 Examination Committee for two years. On this committee I  
8 was responsible for writing and reviewing exam questions  
9 and study materials for the PA-1 and PA-2 exams  
10 (Introduction to Pension Administration Courses), DC-1,  
11 DC-2 and DC-3 exams (Administrative Issues of Defined  
12 Contribution Plans - Basic Concepts, Compliance Concepts  
13 and Advanced Concepts) and the DB exam (Administrative  
14 Issues of Defined Benefit Plans). I have also regularly  
15 attended conferences and training seminars throughout the  
16 country on numerous pension issues.

17 While with the Commission, I have audited a  
18 number of utilities including electric, water and gas  
19 companies and provided comments and testimony in several  
20 cases that dealt with general rates, accounting issues,  
21 pension issues and other regulatory issues. In 2004 I  
22 attended the 46<sup>th</sup> Annual Regulatory Studies Program at the  
23 Institute of Public Utilities at Michigan State University  
24 sponsored by the National Association of Regulatory Utility  
25 Commissioners (NARUC). Since then I have regularly

1 attended NARUC conferences and meetings, primarily the  
2 meetings of the Subcommittee of Accounting and Finance.

3 Q. What is the purpose of your testimony in this  
4 proceeding?

5 A. The purpose of my testimony in this proceeding is  
6 to present and support Staff adjustments to the Company's  
7 revenue requirement, specifically adjustments to employee  
8 wages and benefits, along with an adjustment to property  
9 taxes and a minor adjustment to the Company's revenue to  
10 impute fair market value for two subleases at the One Utah  
11 Center in Salt Lake City.

12 Q. Are you sponsoring any exhibits in this  
13 proceeding?

14 A. Yes, I am sponsoring Staff Exhibit Nos. 104-107.  
15 Exhibit No. 104 is a summary of all of the adjustments I  
16 propose to the Company's Revenue Requirement. The amounts  
17 listed are on a total Company (system) basis and have been  
18 provided to Staff witness Vaughn to include in the  
19 Regulatory Adjustment Model (RAM) and the Jurisdictional  
20 Allocation Model (JAM).

21 Q. Please explain the imputed revenue adjustment on  
22 Exhibit No. 104, line 1.

23 A. The Company's corporate offices are located at  
24 the One Utah Center in Salt Lake City. The Company  
25 currently leases 120,610 square feet at an average price of

1 \$21.31 per square foot, and subleases some of its space to  
2 three major tenants at an average price of \$18.48 per  
3 square foot. In addition, the Company also sublets office  
4 space to the Utah Sports Commission and the Economic  
5 Development Commission of Utah for \$12.00 per year. Staff  
6 believes that it is not appropriate for customers,  
7 especially Idaho customers, to subsidize through  
8 electricity rates the leases for these two Utah Commissions  
9 at the below market rate that PacifiCorp has decided to  
10 grant to them. The total office space occupied by these  
11 two Commissions is 7,689 square feet. I impute revenue of  
12 \$142,069 at a price of \$18.48 per square foot, less the \$24  
13 annually received for these two sub-leases.

14 Q. Please explain your next adjustment.

15 A. The next adjustment I propose on Exhibit No. 104,  
16 line 2, is to remove \$1,603,785 (system) from FERC Account  
17 925 for Injuries and Damages.

18 Q. What is the basis for this adjustment?

19 A. In its Application, the Company proposed using a  
20 three-year average, net of receivables from insurance, of  
21 amounts booked into Account 925, Injuries and Damages, for  
22 a total of \$3,481,634 on a system-wide basis, compared to  
23 only \$1,877,849 during the 2009 test year.

24 Q. Has the Company used the three-year average for  
25 Injuries and Damages in the past?

1           A.    Yes, however, none of those general rate cases  
2 went to a full hearing where the Commission has made a  
3 ruling on the issue.  Staff will occasionally support the  
4 use of averages for accounts that show volatility from year  
5 to year that are beyond the Company's control.  However,  
6 when it comes to Injuries and Damages, each individual  
7 entry into that account is, by its very nature, an  
8 extraordinary and hopefully non-recurring expense.  The  
9 account is a catch-all account for minor accidents,  
10 automobile accidents, and sometimes for damages where  
11 employee negligence is involved.  For those reasons alone,  
12 it would be feasible to argue that the entire amount should  
13 be removed from revenue requirement.

14           Q.    Are you recommending removal of the entire  
15 amount?

16           A.    No.  I propose using the actual amounts booked in  
17 2009 for Injuries and Damages, net of receivables, for two  
18 reasons.  First, the 2009 level was the lowest level booked  
19 into that account over the past three years, so it is an  
20 amount that is reasonably attainable.  By including the  
21 lowest level incurred during the last three years, it  
22 provides incentive for the Company to continue to manage  
23 the amounts it spends on Injuries and Damages.  Secondly,  
24 the amounts booked to Account 925 have been trending  
25 downward, from \$5.4 million in 2007, to \$3.2 million in

1 2008, to \$1.9 million in 2009. This downward trend can be  
2 attributed to safety measures undertaken by the Company  
3 during 2008 and 2009.

4 Q. Briefly describe some of the specific safety  
5 measures that were undertaken by the Company during 2008  
6 and 2009.

7 A. The safety measures, among other things, ensured  
8 that Company policy was developed, effectively communicated  
9 to employees, and was being followed at all levels of the  
10 organization and that there was sufficient control,  
11 monitoring, and correct procedures in place to meet the  
12 stated safety performance, which was to be in the top 10% of  
13 the Company's peer group. The plan also established a road  
14 risk management program to reduce preventable vehicle  
15 accidents by 10% below the 2007 and 2008 targets. The plan  
16 also included crew audits in the field, managers walking  
17 the dock, management's morning stretch and flex and a daily  
18 safety briefing at the start of each shift. Quarterly  
19 facility audits and monthly crew audits were performed.  
20 All deficiencies observed were corrected and responsible  
21 employees received coaching, counseling and training.

22 Q. Does the decline in the amounts spent on Injuries  
23 and Damages reflect that the plan is working?

24 A. Yes, I believe it does. Therefore, it would not  
25 be reasonably prudent to allow the Company to recover in

1 rates any amount that does not take into consideration the  
2 Company's recent safety efforts.

3 Q. Please explain the adjustment to property taxes  
4 shown on Exhibit No. 104, line 3.

5 A. The Company has requested to recover in rates an  
6 amount it believes will accrue for property taxes for 2010.  
7 However, the Company routinely appeals the assessed value  
8 of the property that is taxed by the different states in  
9 which the Company owns and maintains property. Since 2005,  
10 the Company has received refunds from successful appeals  
11 totaling over \$1.7 million. Because the total accrual for  
12 property tax is included in base rates, shareholders  
13 receive the benefit of all property tax refunds. Customers  
14 who are actually paying the accrued property taxes in their  
15 retail rates should receive the benefit of any refunds from  
16 the successful property tax appeals. The adjustment of  
17 \$288,125 is the average amount refunded to the Company for  
18 the tax years 2005 through 2010. This amount is  
19 representative of what I believe the Company may receive  
20 in refunds for successful appeals of the 2010 tax  
21 liability.

22 Q. Please explain the Company's treatment of pension  
23 expense in this case.

24 A. The Company requested to recover its 2010 actual  
25 cash contributions to the pension plan, instead of the

1 accrued expense calculated under the Statement of Financial  
2 Accounting Standards No. 87 (SFAS 87), commonly referred to  
3 as the pension expense. This is consistent with prior  
4 PacifiCorp rate cases and the Letter of Understanding from  
5 the Commission Staff.

6 Q. Can you briefly refresh the Commission on the  
7 difference between the two amounts?

8 A. Without getting into the details of how the two  
9 different amounts are calculated, which has been rehashed  
10 in previous cases, the cash contribution is the actual cash  
11 outlay invested into the plan's trust account, while the  
12 SFAS 87 pension expense is reflected on the financial  
13 statements of the Company as a reduction (or increase) in  
14 the Company's earnings. Both amounts are calculated using  
15 similar principles, although the rules for calculation are  
16 very different. Staff and the Commission have generally  
17 supported the use of the actual cash contribution as the  
18 starting point for determining an amount to be included in  
19 a utility's annual revenue requirement.

20 In this case, the Company reflects a pension  
21 expense of \$31,800,000 to be recorded on its books for  
22 2010, with a cash contribution of \$104,800,000 for 2010 on  
23 a total system basis. After adjusting the amounts to  
24 remove the portion for the mines and to account for just  
25 the O&M portion, the Company proposes an adjustment of

1 \$47.7 million, as shown on Exhibit No. 105, Column (c),  
2 line 11.

3 Q. What is the basis for your adjustment to pension  
4 expense?

5 A. At the time of this writing, the 2010 actuarial  
6 valuation has not been completed. The Company has not  
7 provided any detailed calculations from its actuaries  
8 illustrating how the \$104.8 million contribution was  
9 calculated. Though there is no reason to believe that the  
10 2010 contributions are miscalculated, Staff was not able to  
11 verify the amounts. Furthermore, the estimated future  
12 contributions calculated by the Company's actuaries and  
13 provided to Staff confidentially indicate a significant  
14 decrease in pension funding in future years. The required  
15 contribution for 2010 is approximately twice as much as the  
16 contribution for 2009 and estimated contribution for 2011.  
17 To include the 2010 contribution amount in rates that go  
18 into effect in 2011 and could potentially remain in effect  
19 for several years would allow the Company to collect  
20 significantly more in revenue than necessary to meet its  
21 pension obligations. I have used an average of the  
22 projected contributions to the pension plan for the period  
23 of 2010-2014 as the amount to include in Staff's revenue  
24 requirement for pension expense, as shown on Exhibit  
25 No. 105 Column (d), line 1. The projected future

1 contributions to the PacifiCorp Retirement Plan are shown  
2 on Confidential Exhibit No. 106. The Staff adjustment that  
3 I recommend for pension expense is \$20,875,647 as shown on  
4 Exhibit No. 105, Column (e), line 12 and Exhibit No. 104,  
5 line 4.

6 Q. Please explain the next adjustment on Exhibit  
7 No. 104, line 5 labeled as SERP.

8 A. SERP is an acronym for Supplemental Executive  
9 Retirement Plan. A SERP is a non-qualified plan for  
10 executives of a Company to provide additional benefits  
11 above and beyond those covered in more conventional  
12 retirement plans to ensure the executive can maintain the  
13 same standard of living in retirement. The only active  
14 participant in this retirement plan is the President of  
15 Rocky Mountain Power, and the Company included \$2.6 million  
16 on a total system basis to cover this cost. Idaho  
17 customers should not be required to pay for additional  
18 retirement benefits for executives of a utility above and  
19 beyond the retirement benefits that are available to rank  
20 and file employees. Because an executive's salary is  
21 already higher than the typical employee, and the typical  
22 retirement benefits provided are based on the level of  
23 wages earned, the executive is already receiving a larger  
24 benefit than the other employees. Any additional benefit  
25 provided should be paid for solely by shareholders,

1 especially since an executive's performance is typically  
2 based on creating value for the shareholder.

3 Q. Please explain the next adjustment of \$33,103,859  
4 on Exhibit No. 104, line 6, labeled Incentive Payments.

5 A. Yes, this adjustment represents Staff's  
6 adjustment to the Company's proposed level of employee  
7 bonuses, ultimately removing 100% of employee bonuses from  
8 revenue requirement.

9 Q. Please briefly describe the Company's Incentive  
10 Plan.

11 A. The Company establishes an annual amount to be  
12 awarded to employees each year. The amount an employee  
13 receives is based on an individualized set of goals for  
14 that particular employee. If an employee achieves those  
15 goals, a bonus is awarded.

16 Q. Why are you proposing to remove employee bonuses  
17 from the Company's revenue requirement?

18 A. I am recommending the removal of bonus payments  
19 for two reasons. First, because the criteria to receive a  
20 bonus is on an individualized basis, it is impossible for  
21 Staff to determine if such criteria benefits shareholders  
22 or customers. The Commission has previously ruled that  
23 incentive pay can only be included in annual revenue  
24 requirement if it is related to identifiable customer  
25 benefits. If the criteria for an employee to receive a

1 bonus has a shareholder benefit, then the shareholders  
2 should bear the cost. Any amount of bonus that ties to  
3 operating budgets would have a direct impact on the  
4 earnings per share of the Company and therefore would  
5 benefit shareholders. However, because of the complexity  
6 of the Company's Incentive Plan, there is no way to  
7 determine whether the Commission's criteria to include  
8 bonuses in revenue requirement has been met. Secondly, I  
9 believe that the Commission is cognizant of the public  
10 perception of Rocky Mountain Power awarding employee  
11 bonuses at a time when it is asking to increase the rates  
12 it charges for electricity, and especially when many of its  
13 customers are struggling financially. During a time of  
14 economic despair throughout Rocky Mountain Power's  
15 territory, which is described in Staff witness Thaden's  
16 direct testimony and Exhibit Nos. 115 and 116, it is not  
17 appropriate to seek recovery of bonus payments from  
18 customers. If Rocky Mountain Power believe's that today's  
19 financial environment mandates the need for rate increases,  
20 those rate increases should be mitigated by a concerted  
21 attempt to lower costs and salaries.

22 Q. What is the total percentage of the incentive  
23 plan included in an employee's total compensation?

24 A. The Company has proposed to recover \$33,103,859  
25 for the annual incentive plan and bonuses, which is the

1 2010 budgeted level. Union employees do not participate in  
2 the Company's incentive plan. The total 2010 non-union  
3 proforma wages and salaries is \$201,802,000. This equates  
4 to incentives being 16.4% of total wages for 2010.

5 Q. Would you please explain the adjustment to  
6 Employee Wages listed on Exhibit No. 104.

7 A. The net effect of this adjustment removes all  
8 wage increases awarded by Rocky Mountain Power to its  
9 employees during 2009 and 2010, and sets the level of  
10 straight-time labor at the January 1, 2009 level.

11 Q. Please briefly describe the Company's proposal  
12 for employee wages in this case.

13 A. Actual December 31, 2009 labor related expenses  
14 were annualized to reflect any increases that occurred in  
15 2009 as being included for a full twelve months. The  
16 annualized 2009 labor expenses were then escalated at  
17 either the contractual increase for union employees or the  
18 actual increase for non-union employees to reflect a 2010  
19 pro forma budgeted amount.

20 Q. What types of wage increases were awarded in 2009  
21 and 2010?

22 A. In 2009, non-union employees received a 3.5% wage  
23 increase, while the union employees received between 1.25%  
24 and 3 percent. In 2010, the non-union employees received  
25 an increase of 0.88% while the union employees received

1 between 1.5 and 2.5 percent.

2 Q. Why do you believe these increases are  
3 inappropriate?

4 A. Although the increases may seem minimal, they  
5 occurred at a time of economic distress for Rocky  
6 Mountain's customers. Unemployment rates doubled and  
7 tripled in many parts of the country, included Rocky  
8 Mountain Power's service territory, while wages and the  
9 consumer price index remained relatively flat. Americans  
10 on Social Security will not receive cost of living  
11 adjustments for 2010 and 2011, and most employees with the  
12 State of Idaho were forced to take pay cuts. While much of  
13 the population struggles, it is not prudent for utility  
14 companies to continually grant increases to its employees.  
15 Staff believes that during the past two years, Rocky  
16 Mountain Power had the opportunity to better control costs  
17 and mitigate rate increases. I recommend adjusting  
18 employee wages by \$14,375,075 (Exhibit No. 104, line 7).

19 Q. Please describe the last adjustment on Exhibit  
20 No. 104, line 8.

21 A. The final adjustment I propose is to reduce the  
22 MidAmerican Energy Holding Company (MEHC) Management Fees  
23 allocated to PacifiCorp. Merger Commitment #28 commits  
24 PacifiCorp to limiting the amount of allocations from MEHC  
25 to PacifiCorp at \$7.3 million, which the Company did in its

1 Application. However, included in the \$7.3 million  
2 allocation from MEHC is \$2.15 million in Supplemental  
3 Executive Retirement Plan contributions and bonuses to  
4 employees of MidAmerican. I remove this amount as a  
5 logical continuation of adjustments. Because I recommend  
6 removing bonuses and SERP contributions for Rocky Mountain  
7 Power employees from customers' retail rates, then the SERP  
8 contributions and bonuses for employees of MidAmerican  
9 should also be removed. Exhibit No. 107 illustrates how  
10 the \$7.3 million cap is affected by this adjustment and  
11 shows my adjustment of \$1,100,635.

12 Q. Does this conclude your direct testimony in this  
13 proceeding?

14 A. Yes, it does.
