Please describe your comment briefly:

Why is everyone against wind power? The wind always blows in Idaho so its a great investment for the state. Anyone against wind must be against supporting local businesses and the counties these projects are in. If everyone keeps fighting wind project in Idaho, the developers will go to other states like Oregon, Washington, Montana, Utah, Colorado, or Nevada. Look at the major issue in Japan with the nuclear plants. I know I don't want my family around something like that. Wind power creates JOBS for Idaho people. Who cares if the power is sold to someone else besides Idaho Power! Idaho has great wind potential. That means MONEY FOR IDAHO and THE LOCAL ECONOMY! I would bet money if someone who is against wind power owned a excavation business, concrete company, metal supplier, gravel pits, a trucking company, even fuel suppliers and restaurants, would support Wind Power. These are just some of the businesses needed to make one of these projects happen. So what is wrong with using Idaho's great natural resource to make money for Idaho. If you would rather have nuclear power, move to Japan, then decide. Support Wind power. Let's bring money to Idaho.
