Please describe your comment briefly:

I have some grave concerns about how our utility rates are being manipulated by those who own RMP and also have some interest in wind energy...which is not all it's cracked up to be. (I have a personal wind turbine.)

If coal and natural gas prices have declined...why does my energy bill continue to skyrocket. Obama said that energy bills would 'necessarily skyrocket'. What benefits are you receiving from the government?

When is the next public meeting and why do you hold meetings in Pocatello...there aren't any RMP customers down there?
