RE: ROCKY MOUNTAIN POWER REVISIONS TO ELECTRIC SERVICE
SCHEDULE NO. 135, NET METERING SERVICE; CASE NO. PAC-E-16-07

BACKGROUND

On February 29, 2016, Rocky Mountain Power submitted an Application to modify Electric Service Schedule No. 135, Net Metering Service, by adjusting the participation cap from 714 kilowatts to 2,000 kilowatts. The Application also adjusted the individual generation capacity from 20 percent to 5 percent of the cumulative nameplate capacity.

On April 29, 2016, the Commission issued Order No. 33511, instructing the Company to remove the existing caps on overall and individual generation capacity from Schedule No. 135, and to promptly file conforming tariffs.

STAFF ANALYSIS

Staff has reviewed the changes to the Schedule No. 135 tariff sheets and confirms that the revisions have correctly removed the existing caps on both the overall and individual generation capacity. Staff recommends the Commission accept the revised Schedule No. 135 tariff sheet for filing with an effective date of May 1, 2016.

COMMISSION DECISION

Does the Commission wish to accept the Company's revised Schedule No. 135 tariff sheet for filing with an effective date of May 1, 2016?
