Comment_description: It is time that the IPUC stand up for the people and decline Avista's request to increase the rates on Natural gas and Electric. If you were to research their request, you would find that just a few years ago they were telling everyone to switch over to Natural Gas because it was cheaper and more plentiful. Now they are saying it is more and they have less for the demand. This company should be able to cut costs within that would make up for the higher costs which they are claiming that they are paying. Every year they have this same story and the IPUC grants them their wish and then they post a HUGE PROFIT!!! There are many people who struggle to pay their utility bill, it is time that you, the commission stand up and say "NO", I am sure that Avista would learn to curb their costs and buy more responsibly and still be able to brag about their Huge Profit. Do it for the people this year and just say "NO!"

Thank you,
Diane Fountain
