The revised rate for Schedules 111 and 112 under Energy Efficiency Rider Adjustment Schedule 191 has been adjusted to recover the same amount of revenue previously collected from 111 and 121 customers.

In the company's original filing, as well as the settlement agreement in this Case, the Company included the purchased gas cost adjustment rates (Schedule 150, effective Nov. 1, 2007) in the proposed base tariff rates. As

Schedule 150 was filed as part of the company's PGA filing to be effective October 1, 2008, Schedule 150 rates are *not* included in the base tariff rates, as shown in page 2 of the workpapers.

If you have any questions regarding this filing, please feel free to call Craig Bertholf at (509) 495-4124 or Brian Hirschorn at (509) 495-4723.

SCHEDULE 190 – continued  
 NATURAL GAS EFFICIENCY PROGRAMS – IDAHO

**4.2.4. Technical Assistance** may consist of engineering, financial or other analysis provided to the customer by or under the direction of, Avista Corporation staff. This may take the form of design reviews, product demonstrations, third-party bid evaluations, facility audits, measurement and evaluation analysis or other forms of technical assistance that addresses the cost-effectiveness, technical applicability or end-use characteristics of customer alternatives.

**5. BUDGET & REPORTING**

The natural gas efficiency programs defined within this tariff will be funded by surcharges levied within Schedule 191. The Company will manage these programs to obtain resources that are cost-effective from a Total Resource Cost perspective and achievable through utility intervention. Schedule 191 will be reviewed annually and revised as necessary to provide adequate funding for natural gas efficiency efforts.

**6. OPTIONAL HIGH ANNUAL LOAD FACTOR LARGE GENERAL SERVICE PROGRAM**

Customers receiving natural gas service under Schedules 131 and 132 with cost-effective natural gas efficiency projects are eligible to respond to the Company's Request for Proposals (RFP). The RFP will be developed jointly with representative Customers and the Northwest Industrial Gas Users (NWIGU). The RFP will be available for release no later than April 1, 2001 and annually thereafter.

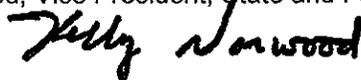

Natural gas savings are to be calculated using standard engineering practices, and with operations schedules documented by the Customer. The Company will review natural gas savings calculations, and reserves the right to modify energy savings estimates. Actual savings may be tried up based on post-installation energy use monitoring. Further details will be provided in the RFP.

Funding is available directly to the Customer upon receipt of customer verification of completed installation. The Company will fund cost-effective projects, using the cost-effectiveness standards to determine the value of natural gas savings, such that the Company's incentive satisfies the Total Resource Cost test (TRC) as a portfolio. Project funding will be up to the amount of conservation revenues collected from the Schedule 131 and 132 Customers under Schedule 191 of this Tariff over the period for which this Schedule is in effect, minus the Company's cost to administer this program. Annual incentive amounts for this program will be subject to the Company's annual budget for energy efficiency programs. Further provisions will be provided in the RFP. The Company, at its option, may inspect installations prior to payments of the funding.
