I am writing regarding Avista's application to increase gas rates and increase the basic monthly charge. The gas charge changes due to supply. The basic monthly charge should not increase. My income keeps going down. How can they just randomly increase the basic monthly charge over 50% with no regard to customers reduced incomes?

In my opinion Avista has always given good service and has great programs for their customers. I do hope you will consider carefully the proposed rate increase. While times might be difficult for Avista they are no less difficult for we customers. To increase our rates by 14% is more than many can bear. Who can we turn to, to give us a 14% pay increase? At a time when costs everywhere are rising the consumer can not always be the one who bears the whole burden. I hope if an increase is approved it will not be more than 2 or 3 percent.

Please describe your comment briefly:

My comment is that a rate increase for electricity at this time in our economy is totally out of line with the constraints of what the general population is suffering. No one in retirement or employment has a 13.1% increase in earnings--or better yet--14.5% increase for the residential customer. Our income has not even regonized an increase enough to keep up with the cost of living--how can the commission justify this increase for customers. Let the customers side of this--be seen clearly--before these rates increases prohibit the population from quiet enjoyment of thier home. We have wind farms close enough to generate all the power needed for our use. Selling for the highest bidder is not the naswer for our communities, here where we should enjoy the con=mforts at reasonable rates. We are over using our power available. Let those over using, to include the entire country--pay for the higher or highest rates. Please let me know if my comment is read by anyone--or just passed off!!
