Comment_description: I would like to comment on the 27% raise that Intermountain Gas is asking for. That is a huge raise especially when you add it to the one they just implemented a few months ago and would be very detrimental to anyone earning the average Idaho wage and to those of us on fixed incomes. With so many other necessities, i.e. food, gasoline, power, etc. also taking raises in cost, one has to wonder how it will be possible to make ends meet. I want to add my voice to all the others who believe this raise is excessive and detrimental. Please carefully consider these worries when you make your decision.
Thank you.

Comment_description:

This proposed rate hike is going to hit Senior citizens rather hard. Most seniors have compromised immune systems and need more heat than younger people do. Maybe you can consider a lessor rate hike for those over 65? When you are on a fixed income 27% more TO KEEP WARM is hard to plan for.

Also most business' keep their stores too warm in the winter. If you wear a coat in most business', you have to shed it to withstand the heat in the stores! Thanks for your time-
Kathryn Burgess
