Comment_description: I received notification about the rate hike Intermtn Gas Co is requesting. It states the average monthly increase for residential customers would be 27.4%.

I don't see how the elderly could absorb such an increase. My husband and I both work full time and with all the increases that are happening are household budget has increased substancially more than our wages. Most elderly are on a fixed budget. My mother-in-law depends on Social Security only for her expenses and you know it isn't increasing by 27.4%.

I would like to suggest that Intermtn Gas and other utilities look at their operation and find areas they could cut and stop asking for increases every few years, if not every year.

Please consider this request, and the request from other utilities, with great sincerity. Times are tough and we need commissions like yours to help the average population.

Thank you so much for listening.

Comment_description: I oppose the rate hike in this matter. I am a state employee who has received only 1 raise in income in the last 3 years and it was not even close to the percentage that the gas company is asking for now. I have student loans to pay and a mortgage payment among other things that also need to be paid. Give us a break!

Comment_description: As a state employee I have not received any type of salary increase in three years. Also with the rising fuel prices for vehicles I can't afford to pay anymore than I already do for natural gas. I purchased a home with natural gas because it is more efficient, it is turning out to not be efficient any longer with the rising prices. A rise of over \$17.00 a month would place a hardship not only on me but other people who are barely making it now.

thank you,
Katie Villa
