Name of Utility Company: Intermountain Gas Acknowledge public record: True

Comment: I cannot believe that in this economy that the commission ruled to give Intermountain Gas a rate increase. Why is it that this commission does not have the backbone to just say no, and give them nothing, except an admonition to manage their assets and live within their budgets like the rest of us. We as customers have been told that there is an excess of natural gas, now there is not as a justification for Intermountain gas to reach into the customers pocket for even more. What kind of asset or remodel or building are the customers going to get stuck with. My solution is just say no, and if they have to shut their doors there will be new takers. This is ridiculous to consider that this rate hike is necessary even though it has been five years since last rate increase, especially since we have been told that there is an abundance of natural gas.
