5.0 CLEAR CHOICE COMMUNICATIONS® DESCRIPTION OF SERVICES

5.1 General

5.1.1 Introduction

The Carrier endeavors to provide high quality service. Service is available twenty-four (24) hours per day, seven (7) days a week, subject to routine maintenance and outages beyond the control of the Carrier. Carrier's switching equipment is designed and engineered to provide high quality transmission of voice and data with a minimum level of impairment such as noise and echo. However, overall quality may vary somewhat due to the variability in quality of the connections provided by the local telephone companies and other interexchange carriers.

5.1.2 Timing of Calls

- (A) Long distance usage charges are based on the actual conversation time transpiring on CCC's network. No charge will generally apply to uncompleted calls, which include "ring busy" and "ring no answer calls," and such uncompleted calls will not be knowingly charged to the Customer and, if charged in error, will be refundable to the Customer. In the event that the Customer fails to hang up when receiving a busy signal or "ring no answer call" for an excessive period of time, however, the Customer may be charged as if the call were completed. CCC will determine that a call has been established by signal, where available, from the local telephone company or underlying carrier.
- (B) Unless otherwise specified in this tariff, the minimum call duration for billing purposes is one (1) minute for a connected call.

5.1.2 Timing of Calls (Continued)

- (C) Unless otherwise specified in this tariff, usage is measured and rounded to the higher full minute for billing purposes.
- (D) When answer supervision is unavailable and CCC has received a reasonable claim from the Customer for a refund of CCC's charges for an uncompleted call, CCC will reimburse the Customer for the charges that CCC has billed for that call.

5.1.3 Service Area

Services will be offered statewide except in the following areas:

Arco	Nu Acres

5.1.4 Calculation of Distance

- (A) Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.
- (B) The Rate Centers of a call are determined by the area codes and exchanges of the origination and destination points.

5.1.4 Calculation of Distance (Continued)

- (C) The distance between the Rate Center of the Subscriber's equipment and that of the destination point is calculated by using the vertical "V" and horizontal "H" coordinates found in AT&T CPUC Tariff No. 10, in the following manner:

Step 1 - Obtain the "V" and "H" coordinates for the Rate Centers of the origination point and the destination point.

Step 2 - Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Rate Centers.

Any ANI disconnected and then reconnected from CCC's service for purposes of subscribing to the special promotion may not be eligible. After the initial subscription to a promotion, if no outbound usage is generated by an ANI within the specified time period as stated in the promotional offering, the customer may not receive benefits from the promotion.
