RE: FRETTEL COMMUNICATIONS, LLC'S 2014 BROADBAND EQUIPMENT
TAX CREDIT APPLICATION; CASE NO. FRC-T-15-01.

BACKGROUND

In 2001, House Bill 377 was enacted authorizing income tax credit for the installation of qualifying broadband infrastructure in Idaho. *Idaho Code* § 63-3029B(3)(a)(ii). In particular, Section 63-3029I allows a taxpayer to receive an investment tax credit for eligible broadband equipment installed during a calendar year.

“Qualified broadband equipment: is defined as those network facilities capable of transmitting signals at a rate of at least 200,000 bits per second (bps) to a subscriber and at least 125,000 bps from a subscriber. *Idaho Code* § 63-3029I(3)(b). If the equipment is installed by a telecommunications carrier, it must also be “necessary to the provision of broadband services and an internal part of a broadband network.” *Idaho Code* § 63-3029I(3)(b)(i). To be eligible for the tax credit, the taxpayer must obtain from the Commission an Order confirming that the installed equipment meets the statutory definition of qualified broadband equipment. Procedural Order No. 28784 and *Idaho Code* § 63-3029I(4). Once the Commission has determined the installed equipment is eligible for the broadband equipment tax credit, an order along with the original Application is forwarded to the Idaho Tax Commission.

THE APPLICATION

On May 11, 2015, Fretel Communications, LLC (“Fretel” or “Company”) filed an Application with the Commission seeking approval of equipment for the broadband tax credit for

calendar year 2014. Fretel states in the Application that it installed equipment associated with Asymmetric digital subscriber line (ADSL) and Ethernet broadband services (using 18k non-loaded copper distribution, fiber optic backbone and distribution cable). The network is capable of providing transmission speeds of 256 Kbps to 1 Mbps from a subscriber and 768 Kbps to 1 Mbps to a subscriber. The Company states that it can serve approximately 50% of its customers with broadband services. Fretel invested approximately \$544,300 in broadband equipment during 2014.

STAFF REVIEW AND RECOMMENDATION

Staff has reviewed the list of proposed broadband equipment and believes the identified equipment qualifies for the investment tax credit pursuant to Procedural Order No. 28784 and *Idaho Code* § 63-3029I(3)(b). Staff also believes that the expenditures identified by the Company, a telecommunications provider, were for equipment that is “necessary for the provision of broadband services and an integral part of a broadband network.” Staff, therefore, recommends that the Commission issue an Order confirming the equipment is qualified broadband equipment and forward the approving Order along with a copy of the original Application to the Idaho Tax Commission.

COMMISSION DECISION

Does the Commission wish to issue an Order confirming the equipment identified in Case No. FRC-T-15-01 is qualified broadband equipment as defined in *Idaho Code* § 63-3029I(3)(b) and forward it to the Idaho Tax Commission?
