Idaho Telephone Assistance Program (ITSAP) provides a communication "Lifeline" to those who might not otherwise be able to afford telephone service. It also enhances the service for everyone by increasing the number of people who can be reached on the telephone network. A small surcharge is applied to every Idaho telephone line each month to reimburse local telephone companies for the cost of state discounts under ITSAP.

What type of discount is available?

Lifeline assistance lowers the cost of basic, monthly local telephone service. Eligible consumers can receive a Federal flat rate credit of up to \$ 9.25 on each monthly telephone bill. ITSAP provides an additional \$2.50 discount per month for a total of \$11.75 for eligible customers.

Toll Limitation Service (TLS) support allows eligible consumers who wish to avoid incurring large long distance fees to choose toll blocking at no cost.

How do I know whether I am eligible?

Eligibility for Lifeline, Link Up, and TLS support *varies by state*. In Idaho, an individual may be eligible if he or she participates in one of the following programs:

- Medicaid
- Supplemental Nutrition Assistance Program (Food Stamps)
- Supplemental Security Income (SSI)
- Federal Public Housing Assistance
- Low Income Home Energy Assistance
- Temporary Assistance to Needy Families (TANF)
- National School Lunch Program's Free Lunch Program
- Head Start

Eligibility is determined by the total household income that does not exceed 135% of the Federal Poverty Guidelines (FPG).

THE ITSAP DISCOUNT APPLIES TO ONLY ONE TELEPHONE NUMBER PER HOUSEHOLD.

How do I apply for ITSAP?

Call Health & Welfare - **208-642-6400** or Western Idaho Community Action Program (WICAP) at **208- 549-2066**. If you are eligible, your name and number will be forwarded to your local telephone company

Cambridge Telephone currently serves 1650 residential and business customers in 5 exchanges in west central Idaho. Of these 1650 customers 1150 currently have some level of broadband service. This service is delivered in a variety of ways. We employ a mix of DSL, fiber to the home and wireless technology to provide broadband to our customers. In the future to meet the bandwidth requirements of our customers Cambridge plans on deploying primarily FTTH based technology. These technologies give us the best opportunity to meet the growing bandwidth requirements that our customers will require.

All capital expenditures included in this report are dependent on the continued receipt of funding from USF mechanisms and the availability of financing. All projections are based on the assumption that support levels will remain at the current levels.
