If an applicant obtains service for the use of others at a different residence, the applicant must have current residential service with the Company in the same state, and must have good credit. If the applicant requests service at a different residence, where a prior customer still resides and where any balance for service to that prior customer incurred at that location is still past due and owing, the past due amount must be paid before service is installed.

B. Charges for Termination Service

1. Service and equipment charges do not apply to disconnect and/or removal of service, equipment, service features or facilities unless otherwise specified.
2. After the expiration of the initial contract period, service may be terminated upon reasonable advance notice to the Company and payment of all charges due to the date of termination of the service, except that, in the case of joint user services, each directory period will be considered as a separate initial contract period, (i.e., listings will be automatically included in each directory unless sufficient advance notice to do otherwise is received from the listed party) and termination may be arranged for only under the conditions specified in 3.b. following.

B.3. (Cont'd)

- c. Where the rated items of equipment associated with other services to which a termination charge applies, are disconnected within the initial contract period and like items of equipment have been added subsequent to the initial installation, termination charges for the items disconnected will be computed on the basis that the equipment removed was the last of its kind installed.

- d. Battery Operated Power Equipment

In the case of battery-operated power service provided for certain Multiline Telephone Systems, the termination charge is an amount equal to one-half of the regular monthly rate specified for the power service for the unexpired portion of the initial contract period.

- e. Where the provision of service requires construction of outside plant facilities for possible short term use, or involves unusual costs or special assemblies of equipment, the initial contract period and termination charge base will be determined by the Company in each individual case. The amount of the termination charge actually billed is such proportion of the termination charge base as the number of days in the unexpired portion of the initial contract period bears to the total number of days in the full initial contract period.

4. Initial Contract Period of Three Years

- a. An addition of rated items of equipment to a regular PBX system is subject to the same initial contract period and termination charge treatment as applies to the PBX system with which it is associated. A separate initial contract period is applicable to each such addition.
- b. In connection with the disconnection of dial switched on step-by-step dial systems where five or less selectors, selector-connectors or connectors are disconnected, no termination charges will be applicable; where more than five such items are disconnected regular termination charges will apply to all the items disconnected.
