Attorneys for Qwest Corporation

**BEFORE THE IDAHO PUBLIC UTILITIES COMMISSION**

**IN THE MATTER OF DETERMINING  
PRICES FOR UNBUNDLED NETWORK  
ELEMENTS (UNEs) IN QWEST  
CORPORATION'S STATEMENT OF  
GENERALLY AVAILABLE TERMS  
(SGAT)**

**CASE NO.: QWE-T-01-11  
MOTION FOR APPROVAL OF  
NEGOTIATED RATES**

---

Qwest Corporation ("Qwest"), by and through its undersigned attorneys, and pursuant to Commission Rule of Procedure 56, IDAPA 31.01.01.056, moves this Commission for its order approving the rates reflected on Attachment A to this Motion. These rates are the product of lengthy negotiations with Staff and are supported by the supplemental testimony of Teresa K. ("Terri") Million, submitted herewith.

## Background

Pursuant to the federal telecommunications act of 1996, 47 U.S.C. § 251 *et seq.*, the Commission is to set nondiscriminatory rates for interconnection facilities and equipment, and for unbundled network elements (UNEs) based on the provisioning cost, which may include a reasonable profit. 47 U.S.C. § 252(d). Idaho statute grants the Commission “full power and authority to implement” the federal act, including “the power to establish unbundled network element charges”. *Idaho Code § 62-615(a)*. Initially the Commission complied with these requirements by setting rates for those UNEs that were requested by the competing carrier in an arbitration proceeding. Unlike regulatory bodies in some Qwest jurisdictions, the Idaho Commission did not open a wholesale cost docket to address permanent UNE rates until several years after the passage of the federal act.

The effort to determine permanent prices for Qwest’s UNEs began in Case No. USW-T-00-15, a docket that was initiated on June 10, 2000, when Qwest filed its first Statement of Generally Available Terms (SGAT). In April 2001, Qwest filed a Motion for Procedural Order asking that the Commission adopt Qwest’s proposed schedule for determining the total element long run incremental costs (TELRIC) of the elements and services contained in its SGAT.

On June 1, 2001, Qwest filed an Amended Motion for Procedural Order asking that the Commission adopt a schedule that reflected a “more informal and open approach” to the task of determining the TELRIC rates for Qwest’s UNEs. This approach included a series of informal workshops to precede the preparation and filing of more formal evidence. The Amended Motion further stated that Qwest would provide hands-on assistance for the use of its cost model and information about the inputs used to produce the cost model results, and would show the effect of using alternative inputs as part of the informal workshop process. The Amended Motion

further contemplated that the informal workshops would be followed by a more formal schedule that provided for the filing of testimony and an evidentiary hearing.

Qwest's Amended Motion was granted in Order No. 28748 issued June 12, 2001. At that time the current docket was opened and the first of what was expected to be a series of workshops was scheduled. Qwest filed direct testimony of several Qwest witnesses to form the foundation of the discussion of Qwest's UNE prices and its cost models.<sup>1</sup> The first workshop was held June 23, 2001.

Although the workshop process began with the participation of intervenors other than the Commission Staff, the intervening parties did not actively participate beyond the initial phases. The Staff and Qwest, however, continued an extensive dialog culminating in the negotiated rates that are represented in Attachment A to this Motion.

### **Negotiated Rates**

As represented in the June 1, 2001, Amended Motion, Qwest conducted the informal workshop process by providing hands-on assistance to interested parties on the operation of its cost models, the inputs used, and the effects of alteration of input values. The Commission Staff was the first party to demonstrate interest in this process and as it evolved, Staff became the only participant other than Qwest, to actively engage. Qwest provided Staff with all of the information it requested, including extensive information about the results of TELRIC dockets in other Qwest jurisdictions.

As the workshop process continued, it became clear that only a portion of the UNEs that are reflected in Qwest's SGAT were the subject of significant controversy between Qwest and the Staff. These UNEs tended to be those that were most often purchased by competing carriers

---

<sup>1</sup> That testimony, filed June 29, 2001, is the subject of Qwest's Motion to Withdraw Testimony filed currently herewith.

and those that made up the product known as Unbundled Network Element – Platform, or “UNE-P”. For the majority of the UNEs, however, Qwest and Staff found that it was feasible to reach a negotiated price founded on Qwest’s cost studies, but modified by using variant inputs in the models or, in some cases, reduced to bring them closer to results ordered in other Qwest jurisdictions. While Qwest is willing to accept these negotiated rates, the Company submits that in some instances these rates represent the lowest reaches of the range of TELRIC prices as ordered by the regulatory bodies.

Qwest has agreed to accept the rates contained in Attachment A and offers the Supplemental Testimony of Teresa K. Million in support of this Motion. These rates represent the product of a lengthy, but fruitful negotiation process, which took many factors into consideration. Approval of the rates contained in Attachment A as Qwest’s permanent TELRIC rates will provide Idaho CLECs with a more useful SGAT. Removing these numerous UNEs from the list of UNEs for which prices must be set in contested proceedings will also benefit Qwest, the Commission and interested parties by conserving regulatory resources and allowing parties to focus only on those remaining wholesale pricing issues that are most significant.

Qwest believes that the Commission’s adoption of these rates complies with the Commission’s obligations to set prices for its UNEs under 47 U.S.C. § 252(d) and to implement the federal telecommunications act of 1996 under Idaho Code § 62-615.

### **Requested Relief**

Qwest asks that the Commission process this request to adopt the rates that have been negotiated between Staff and Qwest using modified procedure. Qwest has submitted the prefiled “Supplemental” testimony of Ms. Million in support of the adoption of the rates in Attachment A, but believes that it would be appropriate for the Commission to simply accept the written

comments of interested parties, including Staff, and make its decision based on the written record, including Ms. Million's submission.

Respectfully submitted this 12<sup>th</sup> day of November, 2003.

<b>17.0 Bona Fide Request Process</b>			
17.1 Processing Fee		\$1,851.86	

**NOTES:**

- 1 Rates found in FCC Tariff #1.
- 2 The preliminary engineering and planning costs are included in the caged and cageless space construction charges. These engineering and planning charges are also included in the caged and cageless quote preparation fees. Upon completion of the collocation construction, whichever quote preparation fee (QPF) has been applied will serve as a credit against the final space construction charge for the collocation job.
- 3 ICB - Individual Case Basis pricing.
- 4 All technically feasible Vertical Switch Features are available with compatible unbundled switch ports.
- 5 No monthly recurring charge applies for Basic Vertical Switch Features because the cost of those features are included in the cost of the switch port. Only Basic Vertical Switch Features with nonrecurring charges are listed in the SGAT Exhibit A. Nonrecurring charges are applicable whenever a feature is added - whether on new installation, conversion, or change order activity. Vertical Switch Features not listed have no incremental nonrecurring charge associated with them.
- 6 The Premium Port monthly recurring charge applies in addition to the Analog or Digital Line Side Port recurring charges when Premium Features are ordered with analog or digital ports.
- 7 The State of Idaho has retained oversight of these rates. These rates are not under the jurisdiction of the FCC.
