Docket No. TOC-T-13-01

**APPLICATION OF
TNCI OPERATING COMPANY LLC**

TNCI Operating Company LLC (“TNCI-OpCo” or “Applicant”), by its undersigned counsel and pursuant to Idaho Code §§ 61-526-528, IDAPA 31.01.01.111, Procedural Order No. 26665, and the rules of Public Utilities Commission of Idaho (“Commission”), hereby applies for a Certificate of Convenience and Necessity (“Certificate”) to provide facilities-based and resold local exchange and exchange access telecommunications services in the State of Idaho.

As described below, this Application is being filed in connection with a transaction whereby TNCI-OpCo will acquire certain of the assets, including customer accounts and contracts and telecommunications equipment, of Trans National Communications International Inc. (Debtor-In-Possession) (“TNCI-DIP”), through a sale pursuant to Section 363 of the United States Bankruptcy Code (the “Transaction”) that was approved by the Bankruptcy Court on March 13, 2013. TNCI-DIP is currently authorized to provide local exchange service (including exchange access) in Idaho pursuant to a Certificate granted by Order No. 29637 dated November 22, 2004. TNCI-OpCo does not currently provide telecommunications services, but is authorized to provide intrastate telecommunications services in Montana and is in the process of

obtaining authority to provide intrastate telecommunications services in all of the contiguous United States, Hawaii, and the District of Columbia. Accordingly, TNCI-OpCo urges that the Commission expedite its consideration of this request for a Certificate to enable the Transaction to be completed as envisioned by the Bankruptcy Court Sale Order as soon as possible. TNCI-OpCo also requests, to the extent required, that the Commission treat this Petition as notice of the Transaction. TNCI-OpCo will notify the Commission when the Transaction has been completed with respect to the intrastate telecommunications operations of TNCI-DIP.

The Applicant submits the following information in support of this request.

I. PROPOSED SERVICES

As noted above, TNCI-OpCo is purchasing the assets and operations of TNCI-DIP and will operate the business as it is currently configured as opposed to constructing any new facilities. TNCI-OpCo intends to provide the same facilities-based and resold local exchange, exchange access telecommunications services to business customers that TNCI-DIP currently provides to its customers. These services include (a) basic local exchange services and various ancillary services such as custom calling features, (b) dedicated Internet Protocol ("IP")-enabled, integrated voice and data services, and (c) private line, frame relay and other non-voice services. Applicant's network will primarily consist of leased facilities provided by other carriers, but where appropriate it may deploy its own facilities. TNCI-OpCo is seeking the same authorizations as currently held by TNCI-DIP so that TNCI-OpCo can continue to provide the same services as TNCI-DIP's customers currently receive from TNCI-DIP.

TNCI-OpCo is technically and managerially qualified to establish and operate its proposed telecommunications operations in Idaho. TNCI-OpCo is managed by individuals with significant experience in the telecommunications industry who are well equipped to manage

providing service in Idaho and will share many of the same customer service, technical, operational and managerial personnel as TNCI-DIP. Descriptions of the Applicant's key personnel of TNCI-OpCo are attached hereto as **Exhibit A**.¹ TNCI OpCo's highly-qualified technical staff will ensure that its operations will meet high standards for service quality and reliability.

II. FORM OF BUSINESS

Applicant's legal name is TNCI Operating Company LLC. Applicant's principal place of business is:

TNCI Operating Company LLC
114 E. Haley Street, Suite A
Santa Barbara, CA 93101
Tel: (805) 560-7809
Fax: (805) 869-1445

TNCI-OpCo is a Delaware limited liability company formed on January 9, 2013. A copy of its formation documents are attached hereto as **Exhibit B**. Attached as **Exhibit C** is a copy of TNCI-OpCo's Certificate of Authority to Transact Business as a foreign corporation in Idaho.

The corporate officers for Applicant are as follows:

Jeff Compton - President & CEO
Julian Weldon - Secretary

As a member managed limited liability company, TNCI-OpCo does not have directors but rather is managed by TNCI Holdings LLC ("TNCI Holdings"), which is also TNCI-OpCo's sole

¹ As described in **Exhibit A**, TNCI-OpCo notes that Mr. Jeff Compton, TNCI-OpCo's President and Chief Executive Officer and a member of its Board of Managers of TNCI Holdings, also serves as Chief Executive Officer and is a co-owner (49%) and Director of Blue Casa Telephone, LLC ("Blue Casa"), a non-dominant local and long distance provider offering services in California. Mr. Howard Brand, the other co-owner and a Director of Blue Casa, also holds a seat on the Board of Managers of TNCI Holdings but will not be an officer of TNCI-OpCo.

owner. TNCI Holdings' Board of Managers include David Thompson, Jeffrey Fier, Jeff Compton and Howard Brand. A fifth manager may be designated in the future.

III. TELECOMMUNICATION SERVICE

TNCI-OpCo intends to provide the same facilities-based and resold local exchange, exchange access telecommunications services to business customers that TNCI-DIP currently provides to its customers and proposes to begin service consistent with the Commission's approval of its Application.

IV. SERVICE TERRITORY

TNCI-OpCo seeks authority to provide local exchange and exchange access telecommunications services to and from all points in the State of Idaho that are currently open, and that become open, to competition. Applicant will compete directly with CenturyLink and Verizon for the provision of local exchange services. As noted above, TNCI-OpCo is purchasing the assets and operations of TNCI-DIP and will operate the business as it is currently configured as opposed to constructing any new facilities.

V. FINANCIAL INFORMATION

TNCI-OpCo has been funded by investment funds managed by Garrison Investment Group (collectively, the "Garrison Group"), a leading middle market investor. Therefore, TNCI-OpCo is well-qualified financially to operate within the State of Idaho. In support of Applicant's financial qualification, confidential pro forma financial information is being provided, under seal, as **Exhibit D**. As shown in the provided information, Applicant is financially qualified to operate within the State of Idaho.

VI. ILLUSTRATIVE PRICE LISTS

TNCI-OpCo's illustrative price lists, setting forth the terms, conditions, rates, charges and regulations pursuant to which TNCI-OpCo proposes to provide regulated telecommunications service is provided as Exhibit E. Since TNCI-OpCo will continue to provide services at the same rates and under the same terms and conditions as TNCI-DIP, TNCI-OpCo's illustrative price lists will mirror the existing tariffs and price lists of TNCI-DIP except for the name and address of the company.

VIII. INTERCONNECTION AGREEMENTS

TNCI-OpCo has not yet entered into or requested interconnection/resale agreements in Idaho, but where necessary for the provision of service has made arrangements with underlying carriers to assume the existing interconnection/resale agreements of TNCI-DIP as part of the bankruptcy process. Applicant plans on using the existing local exchange boundaries and established local calling scope of the incumbent local exchange carriers in Idaho.

IX. COMPLIANCE WITH COMMISSION RULES

TNCI-OpCo's statement that it agrees to comply with all applicable Idaho laws and Commission rules and regulations is attached hereto as **Exhibit F**. Applicant will comply with all applicable Commission rules, regulations and standards, and will provide safe, reliable and high-quality telecommunications services in Idaho.

X. ESCROW ACCOUNT OR SECURITY BOND

TNCI-OpCo does not require advance payments or deposits from retail customers. Should Applicant decide to require advance payments or deposits, it will enter into an escrow agreement with a bonded escrow agent prior to offering telecommunications services in Idaho and will file such agreement with the Commission upon request. TNCI-OpCo will comply with

all applicable Idaho laws and Commission rules and regulations regarding advance customer deposits.

XI. DESCRIPTION OF THE TRANSACTION

Pursuant to an Asset Purchase Agreement, dated as of January 31, 2013 (the "Agreement"), TNCI-OpCo will acquire certain of the assets of TNCI-DIP, including TNCI-DIP's customer accounts and contracts, telecommunications equipment, and, to the extent permitted under applicable law and regulations, certificates, licenses, registrations or other authorizations to provide intrastate, interstate, and international telecommunications services. The Bankruptcy Court approved the Agreement and the Transaction contemplated thereby on March 13, 2013. The Agreement and Sale Order provide for an Initial Closing following receipt of approvals from the FCC, and for additional closings at approximately 45-day intervals until the Final Closing, which will occur no later than the 180th day following the Initial Closing. At each closing, TNCI-DIP will assign to TNCI-OpCo those customers and assets for which applicable governmental approvals have been obtained in order to complete the assignment.

XII. PUBLIC INTEREST CONSIDERATIONS

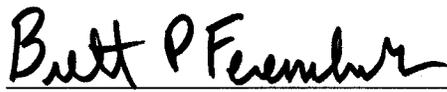

Granting this Application will promote the public interest by allowing the Transaction to be completed, thereby permitting the assignment of TNCI-DIP customers to a financially stable company that will continue to provide telecommunications services to such assigned customers without interruption. Further, TNCI-OpCo's operations will be overseen by a well-qualified management team with substantial telecommunications experience and technical expertise. In addition, the proposed Transaction is structured to assure an orderly transition of customers from TNCI-DIP to TNCI-OpCo. TNCI-OpCo will provide customers high quality, cost effective telecommunications services, with an emphasis on customer service.

Further, granting this Application will promote the public interest by maintaining the current level of competition in the provision of telecommunications services in Idaho. In addition to driving prices closer to costs, thereby ensuring just and reasonable rates, competition also promotes efficiency in the delivery of services and in the development of new services. These benefits work to maximize the public interest by providing continuing incentives for carriers to reduce costs while, simultaneously, promoting the availability of potentially desirable services.

XIII. CONCLUSION

For the reasons stated above, Applicant respectfully submits that the public interest, convenience, and necessity would be furthered by an expeditious grant of this Application for the authority to provide all types of facilities-based and resold local exchange and exchange access telecommunications services.

Respectfully submitted,

PRICE LIST FORMAT

- A. (Sheet / Page – choose one) - Numbering** - Sheet numbers appear in the upper right corner of the Sheet. Sheets are numbered sequentially. However, occasionally, when a new Sheet is added between Sheets already in effect, a decimal is added. For example, a new Sheet added between Sheets 14 and 15 would be 14.1.
- B. (Sheet / Page Revision – choose one) - Numbers** - Revision numbers also appear in the upper right corner of each Sheet. These numbers are used to determine the most current Sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in its Price List approval process, the most current Sheet number on file with the Commission is not always the Sheet in effect. Consult the Check Sheet for the Sheet currently in effect.
- C. Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a) I.
 - 2.1.1.A.1.(a) I.(i).
 - 2.1.1.A.1.(a) I.(i) (1).
- D. Check Sheets** - When a Price List filing is made with the Commission, an updated Check Sheet accompanies the Price List filing. The Check Sheet lists the Sheets contained in the Price List with a cross-reference to the current revision number. When new Sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Sheets). The Price List user should refer to the latest Check Sheet to find if a particular Sheet is the most current on file with the Commission.

SECTION 3 - DESCRIPTION OF SERVICE, Continued**3.3. OPTIONAL CALLING FEATURES**

3.3.1. General - The features listed in Section 3.3.2 are offered by TNCI to Business Customers.

3.3.2. Descriptions of Features

- A. Call Forwarding Don't Answer – Basic: Permits the forwarding of incoming calls when the end-user's line remains unanswered after a pre-designated ringing interval. The ringing interval before forwarding and the forward-to number are fixed by the Service order.
- B. Call Forwarding Busy Line – Basic: Permits the forwarding of incoming calls when the end-user's line is busy. The forwarded number is fixed by the end-user Service order.
- C. Call Waiting – Basic: Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. It permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting is provided with the feature and allows a Call Waiting end-user to disable the Call Waiting feature for the duration of a single outgoing telephone call. Cancel Call Waiting is activated by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call.

SECTION 3 - DESCRIPTION OF SERVICE, Continued**3.3 OPTIONAL CALLING FEATURES, Continued****3.3.2 Descriptions of Features, Continued**

D. Call Waiting – Deluxe: Allows the end-user to control the treatment applied to incoming calls while the Customer is off-hook on an existing call. This feature includes the capabilities of Call Waiting Basic plus additional call treatment options. Treatment options offered with Call Waiting Deluxe include:

1. Answer the waiting call and placing the first party on hold;
2. Answer the waiting call and disconnecting from the first party;
3. Direct the waiting caller to hold via a recording; and
4. Forward the waiting caller to another location (e.g., voice mailbox or telephone answering Service).

Full utilization of Call Waiting Deluxe requires specialized Customer Provided Equipment, which is not provided by TNCI. It is the responsibility of the Customer to provide the necessary equipment. The end-user must have either Caller ID Basic or Caller ID Deluxe for display of calling party identification information for waiting calls. The End-User must have a Call Forwarding Don't Answer feature active in order to forward a waiting call to another location.

E. Caller ID – Basic: Permits the End-User to view a Directory Number of the calling party on incoming telephone calls. Information is displayed on specialized Customer Provided Equipment. The feature also provides the date and time of each incoming call. It is the responsibility of the Customer to provide the necessary equipment.

SECTION 3 - DESCRIPTION OF SERVICE, Continued**3.3 OPTIONAL CALLING FEATURES, CONTINUED****3.3.2 Descriptions of Features, Continued**

- F. **Caller ID – Deluxe:** Permits the end-user to view a Directory Name and Directory Number of the calling party on incoming telephone calls. Information is displayed on specialized Customer Provided Equipment. The feature also provides the date and time of each incoming call. It is the responsibility of the Customer to provide the necessary equipment. In some situations, the calling party's city and state may be displayed, rather than a Directory Name, depending on available call data.
- G. **Anonymous Call Rejection:** Permits the end-user to automatically reject incoming calls when the call originates from a telephone number that has blocked delivery of its calling number (see Calling Number Delivery Blocking). When active, calls from private numbers will be routed to a special announcement then terminated. The feature may be turned on or off by the end-user by dialing the appropriate feature control code. Anonymous Call Rejection either is offered either as a stand-alone feature or as an add-on to Caller ID Deluxe.
- H. **Call Block:** Allows the end-user to automatically block incoming calls from up to six end-user pre-selected telephone numbers programmed into the feature's screening list. Callers whose numbers have been blocked will hear a recorded message stating that their call has been blocked. The end-user controls when the feature is active, and can add or remove calling numbers from the feature's screening list.
- I. **Call Return:** Allows the Customer to return a call to the last incoming call, whether answered or not. Upon activation, it will redial the number automatically, and continue to check the number every 45 seconds for up to 30 minutes, if the number is busy. The Customer is alerted with a distinctive ringing pattern when the busy number is free. When the Customer answers the ring, the call is then completed. The calling party's number will not be delivered or announced to the call recipient under any circumstances.

SECTION 3 - DESCRIPTION OF SERVICE, Continued**3.3 OPTIONAL CALLING FEATURES, Continued****3.3.2 Descriptions of Features, Continued**

- J. Call Selector: Allows a Customer to assign a maximum of 15 telephone numbers to a special list. The Customer will hear a distinctive ring when calls are received from telephone numbers on that list.
- K. Call Tracing: Allows the tracing of nuisance calls to a specified telephone number suspected of originating from a given local office. The tracing is activated upon entering the specified dial code. The originating telephone number, outgoing Trunk number or terminating number, and the time and date, are generated for every call to the specified telephone number, which can then be identified.
- L. Calling Number Delivery Blocking: Prevents the delivery, display and announcement of the end-user's Directory Number and Directory Name on all calls dialed from an Exchange Service equipped with this option. When active, the end-user's telephone name and number will not appear on the called party's Caller ID Customer Provided Equipment or be disclosed in another way. The feature is available on a per-call or per line basis. With per call Calling Number Delivery Blocking, it is necessary for the end-user to dial an activation code prior to placing the call. With the per line version of the feature, all calls are placed with the end-user's number blocked. Per line, end-users must dial an activation code prior to utilization.
- M. Message Waiting Indication: Provides the end-user with an audible (stutter dial tone) or visual (lamp or other Customer Provided Equipment display) indication that messages are waiting to be retrieved. Message Waiting Indication can only be activated/deactivated by a voice mailbox or other voice messaging service provided by TNCI or third party. It is the responsibility of the Customer to subscribe to a compatible voice messaging service. Visual Message Waiting Indication requires specialized Customer Provided Equipment. It is the responsibility of the Customer to provide the necessary equipment.

SECTION 3 - DESCRIPTION OF SERVICE, Continued**3.3. OPTIONAL CALLING FEATURES, Continued****3.3.2. Descriptions of Features, Continued**

- N. **Multiple Directory Number Distinctive Ringing:** This feature allows an End User to determine the source of an incoming call by a distinctive ring. The End User may have up to two additional numbers assigned to a single line (i.e. Distinctive Ringing – First Number and Distinctive Ringing – Second Number). The designated primary number will receive a normal ringing pattern. Other numbers will receive distinctive ringing patterns. The pattern is based on the telephone number that the calling party dials.
- O. **Speed Calling:** Permits the Customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. The feature is available as either an eight (8) code list or a thirty (30) code list. Code lists may include local and/or toll telephone numbers. The Customer has the ability to add or remove telephone numbers and codes to/from the speed- calling list without assistance from TNCI.
- P. **Three Way Calling:** Permits the end-user to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The end-user initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.

TNCI will send a letter to each Customer upon initiation or transfer of Service, which informs the Customer of the option to freeze his/her intraLATA, interLATA and local Service provider choice(s). At the time a Customer contacts TNCI to establish a freeze, a representative will advise him/her on how to facilitate a change of provider(s) on a frozen account.

SECTION 4 – RATES, Continued**4.3. INTRALATA PRESUBSCRIPTION**

- A. IntraLATA presubscription is a procedure whereby a subscriber designates to TNCI the carrier which the subscriber wishes to be the carrier of choice for intraLATA toll calls. Such calls are directed to the designated carrier, without the need to use carrier access codes or additional dialing. IntraLATA presubscription does not prevent a subscriber who has presubscribed to an intraLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative intraLATA carrier on a per call basis.
- B. IntraLATA Presubscription Offerings:
- (i) Option A: Subscriber may select TNCI as the presubscribed carrier for intraLATA toll calls subject to presubscription;
 - (ii) Option B: Subscriber may select his/her interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription;
 - (iii) Option C: Subscriber may select a carrier other than TNCI for the subscriber's interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription; or
 - (iv) Option D: Subscriber may select no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the subscriber to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.
- C. Rules and Regulations
- (i) Subscribers will retain their current dialing arrangements until they request that their dialing arrangements be changed.
 - (ii) Subscribers may select either Options A, B, C or D for intraLATA presubscription.
 - (iii) Subscribers may change their selected Option and/or their presubscribed intraLATA toll carrier at any time.

SECTION 4 – RATES, Continued**4.3. INTRALATA PRESUBSCRIPTION, Continued**

- D. New subscribers will be asked to select an intraLATA toll carrier(s) at the time the subscriber places an order to establish local exchange service with TNCI. TNCI will process the subscriber's order for intraLATA service. The selected carrier(s) will confirm their respective subscriber's verbal selection by third-party verification or return written confirmation notices. All new subscribers' requests for intraLATA toll service presubscription shall be provided free of charge.

REGULATIONS, Continued**2.9 Application of Rates**

The regulations set forth in this section govern the application of rates for Services contained in other sections of this Price List.

2.9.1 Charges Based on Duration of Use

Customer traffic to End Offices will be measured (i.e., recorded or assumed) by the Company. Originating and terminating calls will be measured (i.e., recorded or assumed) by the Company to determine the basis for computing chargeable access minutes. In the event the Customer message detail is not available because the Company lost or damaged tapes or experienced recording system outages, the Company will estimate the volume of lost Customer access minutes of use based on previously known values.

A) Originating Traffic

For originating calls over Customer's Feature Group D, usage measurement of access minutes begins when the originating Customer's Feature Group D switch receives the first wink supervisory signal forwarded from the Customer's point of termination.

The measurement of originating call usage ends when the Customer's originating Feature Group D switch receives disconnect supervision from either the Company's Network, indicating the originating End User has disconnected, or the Customer's point of termination, whichever is recognized first by the Company's Network.

B) Terminating Traffic

For terminating calls, the measurement of access minutes begins when the Customer's terminating Feature Group D switch receives answer supervision from the Company's Network, indicating the terminating End User has answered. For terminating calls over Customer's Feature Group D Access Service, the measured minutes are chargeable access minutes. Where assumed minutes are used, the assumed minutes are the chargeable access minutes.

Traffic

- A. This section governs the identification and treatment of VoIP-PSTN Traffic that is required to be compensated at interstate access rates unless the parties have agreed otherwise in a written agreement. Specifically, this section establishes the method of separating such traffic (referred to in this Price List as “Relevant VOIP-PSTN Traffic”) from a Customer’s traditional intrastate access Price List, so that such Relevant VOIP-PSTN traffic can be billed in accordance with the FCC Order.

Company will bill and collect the full Access Reciprocal Compensation on traffic exchanged with Customers when such traffic originates and/or terminates in Internet Protocol format, as set forth in Section 51.913 of the Federal Communications Commission’s rules, 47 C.F.R. § 51.913.¹

Intrastate VoIP – PSTN traffic is subject to the Company’s applicable interstate switched access rate per minute, as set forth in the Company’s F.C.C. Price List No. 2.

Traffic, Continued****B. Calculations and Application of Percent-VoIP-PSTN Usage**

Company will determine the number of Relevant VoIP-PSTN Traffic minutes of use (“MOU”) to which interstate rates will be applied under subsection 3.2.A, above, by applying a Percent VoIP Usage (“PVU”) factor to the total intrastate access MOU exchanged between a Company End User and the Customer. The PVU will be derived and applied as follows.

1. The Customer will calculate and furnish to Company a factor (the “PVU-A”) representing the percentage of the total terminating intrastate and interstate access MOU that the Customer exchanges with Company in the State, that (a) is sent to Company and that originated in IP format; or (b) is received from Company and terminated in IP format. This PVU-A shall be based on information such as the number of the Customer’s retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.
2. Company will similarly calculate a factor (the “PVU-B”) representing the percentage of Company’s total terminating intrastate and interstate access MOU in the State that Company originates or terminates on its network in IP format. This PVU-B shall be based on information such as the number of Company’s retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

Traffic, Continued****B. Calculations and Application of Percent-VoIP-PSTN Usage, Continued**

3. Company will use the PVU-A and PVU-B factors to calculate a PVU factor that represents the percentage of total terminating intrastate and interstate access MOU exchanged between a Company End User and the Customer that is originated or terminated in IP format, whether at Company's end, at the Customer's end, or at both ends. The PVU factor will be calculated as the sum of: (A) the PVU-A factor and (B) the PVU-B factor times (1.0 minus the PVU-A factor).

4. Company will apply the PVU factor to the total terminating intrastate access MOU exchanged with the Customer to determine the number of Relevant VoIP-PSTN Traffic MOUs.

Example 1: The PVU-B is 10% and the PVU-A is 40%. The PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. Company will bill 46% of the Customer's terminating intrastate access MOU at its applicable Price Listed interstate rates.

Example 2: The PVU-B is 10% and the PVU-A is 0%. The PVU factor is $0\% + (100\% \times 10\%) = 10\%$. Company will bill 10% of the Customer's terminating intrastate access MOU at Company's applicable Price Listed interstate switched access rates.

Example 3: The PVU-A is 100%. No matter what the PVU-B factor is, the PVU is 100%. Company will bill 100% of the Customer's terminating intrastate access MOU at Company's applicable Price Listed interstate switched access rates.

5. If the Customer does not furnish Company with a PVU factor, the Company will utilize a PVU-A factor of zero.

If the PVU-A factor is not available and/or cannot be implemented in Company's billing systems within 30 days of the effective date of this Price List, the Company will adjust the Customer's initial PVU-A to zero.

D. PVU Factor Updates

The Customer may update the PVU-A factor quarterly. The Customer shall submit such update no later than the 15th day of January, April, July, and October of each year. Revised PVU factors must be based on the data for the prior three months ending the last day of December, March, June, and September respectively. The Company will use the revised PVU-A factor to calculate a revised PVU. The revised PVU will be used for future billing and will be effective on the bill date of each month and will be used for subsequent monthly billing until superseded by a new PVU factor. No prorating or back billing will be done based on the updated PVU factors.

E. PVU Factor Verification

Not more than twice in any year, Company may ask the Customer to verify the PVU-A factor furnished to Company and a Customer may ask Company to verify the PVU-B factor and the calculation of the PVU factor. The party so requested shall comply, and shall reasonably provide the records and other information used to determine the respective PVU-A and PVU-B factors.
