Bitterroot Water Company Requests An Increase in Rates Citing Rising Power and System Improvement Costs

CONTACT: Ken Rickel, President
(208) 208-683-8105 or 208-660-2560

Bitterroot Water Company has filed a request with the Idaho Public Utilities Commission for a rate increase in the base water rate from \$20 per month to \$45 per month to help offset the increasing costs associated with the operation, maintenance and capital improvements to the water system. There would be no increase in the charge for gallons used in excess of the 15,000 base amount allowed.

The company last filed for a rate increase in 1998 while serving 54 customers. The system has now expanded to serve 116 customers and is considered to be at capacity based on the number and size of the lots now included in the subdivision. Further growth would be based on subdividing existing lots.

In the last 12 months, the system has been systematically reviewed and upgraded to maintain compliance with increasingly tougher government standards for water quality. The increased operating expenses are largely out of the company's control. Rising power costs play the biggest role in recent operating expense increases.

The rate proposal is subject to public review and will be reviewed and approved by the Idaho Public Utilities Commission. A copy of the application is available for public review at the Bitterroot Water Company Office and the office of the Idaho Public Utilities Commission.

Bitterroot Water Company, organized in 1995, is an independent owner-operated water utility whose purpose is to supply water for domestic, commercial, industrial and fire protection purposes. The Company is subject to the regulations of the Idaho Public Utilities Commission as well as various Federal and State regulatory agencies concerning water quality standards.
