Comment_description: I am commenting on the proposed increase of the base rate on our water usage. I personally would not be opposed to an increase on the base rate if our base gallons allotment were also increased accordingly. I am to a point were I can't afford to water my lawn in the heat of the summer. If Rickel wants to more then double our base rate, then he should more then double our base gallons. I for one can not afford \$200 a month water bills in July, August, and September.

Looking at year round usage, I average about \$50 a month as it is. That is plenty to pay for water in a rural setting where water is cheap and plentiful.

Comment_description: To Whom it may concern,

I don't feel that all concerns were answered at the work shop on the 2nd of November. For example why punish the entire water system for a few homeowners that do not provide reasonable access to the meter? Would it not be better to charge the homeowner that does not provide access a penalty fee?

Over the summer I have seen several water trucks and hydro-seeders in the bitter root water system. Are these companies being charged a fee for taking water? I know other water companies do charge and some charges are as high as \$500.00 per year.

These are just a few questions that did not get answered at the workshop that I feel should be looked into or at least considered.

Thank you
Michael Parker
