RE: Request to raise base rate \$12.50/mo.

Sirs:

BRN-W-12-01

Currently, the water rates for the Brian Water Corp. are \$17.50 per month base for the first 4000 gallons and \$1.51 per 1000 gallons per month above the 4000 gallons.

I am requesting that the base rate be raised another \$12.50/month. The purpose of this increase is to pay for 'Nitrate Mitigation' as ordered by the EPA/DEQ.

The nitrate levels in the wells of the Brian Water Corporation this past year have risen above the EPA's maximum contamination level (MCL) of 10.0/mg/L. The most recent water sample showed levels of 12.2 mg/L but have been as high as 15.0 mg/L. Consequently, I am ordered to start the process to solve the issue. The first step is to hire an engineer to do an analysis and make recommendations to the DEQ. (One engineers price quote was up to \$20,000) We already know that a new, deeper well is the only viable solution. Estimated cost for one well with pump is \$30,000. The base rate add-on will be used solely for payments to an engineer and payments on a loan for the well.

I'm asking for an effective date of April 2012.

Sincerely,

Tony Bowar
