Comment_description: I believe that this rate hike of over 65% is not justified. Falls Water has known about the growth in this area and has actually participated with local governments in planning and zoning meetings. Therefore, their lack of foresight to plan for this growth does not justify a 65% increase in our water bills. The proposed changes not substantially increase our monthly bill, but reduce the entitlement of water by over half. Please do not pass this request. The growth numbers they are seeing in customers should easily provide for the necessary staff to provide service.

Comment_description: There always seems to be increases in all utilities, but never much increase in job pay. We have had many people move into the area recently and now it seems that we are being asked to pay for the equipment to increase water flow to new development. We paid substantially for hook up in our area back when we came and don't think it fair for our rates to increase to pay for the increase in new building population. Increases in the rates should be passed onto builders and built into the cost of the sale of the home. Not into our already paid for and established homes and lines. I realize costs for development will always increase and see the need to keep pace but remember that those of us who have been here a while have already paid for the equipment to bring water and other utilities to our area and our homes. We shouldn't have to pay for it again.

Comment_description: I would like to propose a negative comment for Falls Water rate increase proposal! The rate increases are huge! We are getting charged more for less water than they are currently supplying. They want to charge us 36% more per gallon, reduce the amount for that cost by nearly 60% as well as increase the overage charge by over 100%. I do not like this. Falls Water is stating that because of the development that is happening in our area, they need to charge more. This argument does not make sense. If they charge the new folks as much as existing (charging developers as well for water that they use), then I don't see the reasoning for this large of an increase. I am not amused with their application for rate increase!

§ 4

To whom this may concern,

I am writing to you because a neighbor has brought some disturbing information to me! I have purchased a new home in Cornerstone Community and so far really like it. When I was approached by a neighbor about the proposed rate hikes, I was out raged! I cannot believe that you are not only raising our bill but also **decreasing** our water amounts! **I am against this rate hike and YOU (IPUC); need to prove to YOUR customers that this is a necessary expense!**
