Please describe your comment briefly:

I understand that the cost of business may continue to increase, but an increase of 14.88% is too steep. Every year the costs continue to increase, where is it going to stop? We continue to pay ever increasing water fees, are our fees going to continue to increase at this rate every year? Other neighborhoods not with Falls Water continue to have their rates stay the same, why do ours continue to increase every year? Our costs are getting to be excessive.
