IDAHO PUBLIC UTILITIES COMMISSION**

**APPLICATION OF FALLS WATER CO., INC. )  
TO AMEND CERTIFICATE OF PUBLIC )  
CONVENIENCE AND NECESSITY No. 236 )**

CASE NO. FLS-W-15-01

Comes now, Falls Water Co., Inc. ("Falls Water"), pursuant to Section 61-526, Idaho Code and Rule 112 of the Idaho Public Utilities Commission Rule of Procedure ("IPUCRP"), applies to the Idaho Public Utilities Commission ("Commission") to amend and revise its Certificate of Convenience and Necessity No. 236 by enlarging and extending the boundary of the area in which it is authorized to provide service. In support of this Application, Falls Water submits the following:

I.

Falls Water, a public utility water corporation within the meaning of the Idaho Public Utilities Law, is duly organized and existing under the laws of the State of Idaho and engaged in conducting a general water business in and about Bonneville County, Idaho, having its principal office and place of business at 2180 North Deborah Drive, Idaho Falls, Idaho 83401.

II.

Communication in reference to this Application should be addressed to:

K. Scott Bruce  
Falls Water Company, Inc.  
2180 North Deborah Drive  
Idaho Falls, ID 83401  
E-mail: [scott1@fallswater.com](mailto:scott1@fallswater.com)

III.

A certified copy of Applicant's Articles of Incorporation, together with all amendments to date, is on file with the Commission.

IV.

Applicant owns and operates an extensive integrated water system in Bonneville County and renders general water service within such territory and to the inhabitants thereof.

V.

The Commission's order 32663 required Falls Water to amend its Certificate of Convenience and Necessity to include the areas that are currently being served outside the service area. The areas were built by various developers over the past sixteen years and serviced by Falls Water.

VI.

The areas proposed to be served by this Application are adjacent to Falls Water's existing certificated area. The legal descriptions for the areas have been grouped into six areas. A map Exhibit A and the legal descriptions Exhibit B-1 through Exhibit B-6 are attached.

On the south end of Falls Water's amended service area, the system is adjacent to the City of Ammon, which has its own public water system. Exhibit C is a Memorandum of understanding with the City of Ammon. The memorandum denotes an agreed upon service boundary between the City of Ammon's water system and Falls Water's system. The memorandum was agreed upon to maintain the integrity of each system and avoid problems with localized areas of poor water flows and pressures if the two systems had not agreed to a mutual service boundary.

VII.

Service to the amended service areas will be provided through water mains and service lines installed by the various developers through Falls Water's standard "Main Extension Contract" as provided for in its tariff on file with the Commission.

There will be no effect on Falls Water's revenue requirements.

VIII.

Falls Water has an adequate source of supply to provide service to the amended service area in a safe and reliable manner.
