To whom it may concern:
The application by Island
Park water for a 224%
increase is ludicrous.

They have ignored
our pleas over no water
pressure continuously, with
not enough pressure to
take a shower. There have
been several days we have
gone without any water.

I think these practices
should be looked into before
any rate is considered.

Please describe your question or comment briefly:
Actually we have been anticipating an increase for a number of years, but this request is way too much, too quick. How about a gradual phase-in of this increase? Say 5 years or so. The company has done little maintenance over the years and is now in desperate straights to catch up. IP Water has ignored all homeowner's complaints during that time. That is hardly the fault of the homeowners in the area. Additional if the increase would guarentee useable water, then we'd be all for a phased-in increase. For years we have carried our own drinking water to our place on Chickasaw Drive because the water is just plain nasty and off color most of the summer. You might also think about charging more to those year-round residents or those who occupy their homes for more time than many of us summer residents do. Thank you for this opportunity to comment on the proposed rate increase for Island Park Water case # ISL-W-08-01

Please describe your question or comment briefly:

We have a cabin in Island Park which we use 1 time a month. This water increase from \$125.00 to \$280.00 per year seems excessive. A 225% increase is not acceptable in any industry or business. This may cause us to rethink keeping the property in Island Park.

Please rethink this increase, and bring it down to a reasonable level.

Thank You,

Brenda Wilson
