we think that the increase of our water bill is absurd, because like many others that live in this town are on social security or disabled living on limited income. also we would like to know why this man who owns murray water works disabled water hydrants when he put in new water mains, not only that, if we were to have a forest fire or a house fire that disrupted our power, there is no back up generator power for the well and we have no hydrants because they have been disabled. we need a public hearing. The proposed rate increases by Murray Water Works are very excessive. The small, rural Town of Murray is inhabited predominately by fixed income seniors and disabled persons. The increases would severely impact them unnecessarily.
