RE: Packsaddle Water Systems, Inc.
Packsaddle Creek Estates
Teton County, Idaho
Case No. PKS-W-15-01

I have been a property owner in Packsaddle Estates for more than ten years. It is a very warm and supportive neighborhood. The water system issue is very troubling.

There is no Packsaddle Estates Neighborhood Association. Property owners were unaware that ownership of the water system had been transferred to two property owners in the neighborhood until after the legal work had been done. Once property owners became aware of the situation, a neighborhood meeting was scheduled. The meeting was held in July of 2015 so that property owners could be informed of the recent transactions. Many questions were asked. Due to the serious concern expressed by the attendees, it was agreed that four property owners would be selected to serve on a "Board". There has been no communications related to any "Board Meetings".

I repeat, there is no Neighborhood Association in Packsaddle Estates located in Teton County, Idaho. It is very important that the Packsaddle Water System, Inc. be under the authority of the Idaho PUC.

Thank you,

Elizabeth S. Cheshire
