Comment_description: Revised Comment;

Rasing the utility rate by 100% would be an unethcal increase as the water system in it's current state is NOT sufficent to provide adiquite service to ALL current and future residents. During the summer months many Spirit Lake East residents do NOT have enough water pressure to take adiquite showers or run a dishwasher etc... This is a result of the system being taxed far more than it's capacity can provide. This community was originally designed for TWO wells, the second has not been installed ? if the owner is so concerned with the water system, I would ask him,,, why is it that you have known and allowed 1000's of gallons of water to leak out of a breather in our driveway for the last two months ? why hasn't the MAIN holding tank CRACK been repaired ? NO!!! We will dispute this proposed increase until the following issues are resolved or a deadline has been established in writing for the NEEDED upgrades and repairs.

- 1)A second well installed to suffice capacity requirements
- 2)Crack repaired in main holding tank
- 3)All Valve leaks repaired

If you have any questions do not hesitate contacting!

Regards, Mr. Douglas Watson

Comment description: I strongly urge you not to allow the Spirit Lake East Water Company to double our rates as they requested. SLE Water Company has essentially stated they have ignored the condition of the water system for over 23 years and now want to force the customer to pay for their negligence. I don't see any justification for a 100% increase in rates just to cover up Hansen Industries and SLE Water's poor business practices.
