Please describe your question or comment briefly:

It is important that a hearing on the rate increase and the apparent lack of understanding of the responsibilities of a public utility by Hanson Industries be scheduled. To assert that their lack of judgement over the past 20+ years should result in a doubling in rate at this date can not be allowed. If they had asked for rate increases over the past two decades and properly maintained the water system, there would be no issue today. They neglected their investors and their customers and are now asking the commission to levy an increase on a much larger population than would have been the case had they asked for periodic increases over the past two decades. Their mismanagement and neglect should not be rewarded.

Please describe your question or comment briefly:

Re. SLEWCO's (Hanson Industries) application for a 100% rate increase.....a hearing is justified for this. Hundreds of homeowners are affected including me. Since when does any co. demand to be paid back for 23 years of operation? If they lost money, they need to improve efficiency. If they are allowed to run a water co., they should run it efficiently at competitive prices not scalp its customers. They let an old system get run down in extreme disrepair. Not likely that it can even be repaired; this has gone on for many years; most likely needs to be replaced. To threaten us by saying they want to wash their hands of this co. is ridiculous. Likewise, a co. that requests a 100% increase sounds like a co. that wants to stay in business. So which is it? In or out? If they are out, then how do we get water? We want a hearing to be held. We have a right to attend, listen, question and contest. A utility company cannot be allowed to hold us hostage in our own homes. Thank you.
