Please describe your comment briefly:

I received a letter regarding a rate increase of 106% that is being sent to you for approval. I am against that large of a rate increase especially during these economic times. I would not expect to get a salary increase of that amount and yet we are supposed to suffer large utility hikes without a problem. I think if a rate increase is needed it should not exceed 10%, although that even is high for an annual fee hike, and 2-4% would be more appropriate. If our current water provider thinks this is acceptable, perhaps we should be shopping around for a different provider.
