IDAHO PUBLIC  
UTILITIES COMMISSION

January 11, 2012

Dear Utility Customer,

In the summer of 2011, the Teton Springs Water & Sewer Company (TSWS) was required to replace the pumps and motors in both of the deep water wells which provide the domestic water for the Teton Springs utility customers. The replacement was necessitated due to a failure of the pump and motor in Well #2, and the reduced production capacity of Well #1. The ages of the pumps were 8 and 7 years, respectively.

The total expense incurred for this capital replacement work on the wells was approximately \$26,000.

In September of 2011, TSWS filed an application with the Idaho Public Utility Commission (IPUC) requesting authorization to implement a one-time assessment for the utility customers. The assessment is to reconstitute the capital reserve fund which was set aside for projects such as this as well as to repay the capital reserve fund shortfall.

The amount of assessment requested in the IPUC application for each utility customer is as follows:

<u>Customer Type</u>	<u>Assessment</u>
1" Single Family Residential	\$ 85.00 per customer
1" Multi-Family Residential (Lodge & Condominiums)	\$ 85.00 per unit
1" Commercial	\$ 85.00 per customer
2" Commercial	\$175.10 per customer
3" Commercial	\$667.25 per customer
4" Commercial	\$850.00 per customer
6" Commercial	\$1,275.00 per customer
