Comment_description: It is time to get back the control and ownership over one of our most precious resources. The water belongs to boise and not a bunch of profitters shareholders and a foreign company that already controls 30% of the U.S. fresh water. How can we allow one of our most needed resources be jobbed out and have profit taken from it. ??We need to take back control and put the profits back into the water system and save it's users some money.

Plus we need to flow Eagles approach to their water ideas and start making new developments use the zero scaping rather than allow these new sub. on top of arid hills tops put in grass that will required inordinate amount of fresh water. We need more presurized water so we do not need to use processed water for yards and gardens!!!

Comment_description: We are against the proposed increase in the water billing. We feel the new developers should carry a larger burden of this rather than the local consumers, homeowners and tax payers.

Problem #1

Dear members of PUC Comm.

I am writing concerning this 22.35% rate hike asked for by United Water. What are they thinking? What you people have proposed should be sufficient. I for one cannot afford the 22.35%. I am a widow on a very limited income, as are many others. I live in a Mobil Home Park with a small yard. It takes water to keep my yard neat. I am frugal in usage, but please do not give them such a big boost in charges.

I will be very grateful.
Problem #2

We people living here in Golden Dawn & Barburton Estates Mobil Home Park have our own good working sewer system. A call to Public Works tells me that everyone here will be charged \$1100⁰⁰ to hook our system to City system. Nothing needs to be done but hook on. Our system is all in & working well. How can they do this? I told him - "If you can get blood out of a turnip - try it. No one here can afford such as that! Please advise as to the truth of this. Respectfully, Elizabeth Slater
