UWI-W-05-03

SUPPLEMENTAL COMMENTS OF
EAGLE WATER COMPANY, INC.

COMES NOW, EAGLE WATER COMPANY ("Eagle Water"), and files the following Supplemental Comments in response to the Idaho Public Utilities Commission's Proposed Order granting service of Covenant Hill Subdivision to United Water of Idaho, Inc.

COMMENTS

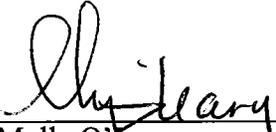

In support of Eagle Water's assertion that it currently has adequate water supply to meet fire flow requirements for the proposed Covenant Hills Subdivision, Eagle Water hereby submits a letter from Kurt McClenny, Fire Marshall for the Eagle Fire Department. *See Eagle Water Exhibit No. 4*, attached.

In addition, Eagle Water wishes to clarify that it believes that, in light of the fact that the majority of the proposed Covenant Hills Subdivision is in Eagle Water's

certificated area, Eagle Water should be designated as the sole provider of water service to the subdivision.

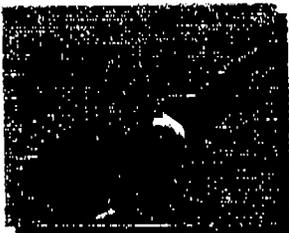

DATED this 10th day of November, 2005.

RE: Fire Flows

Dear Norm,

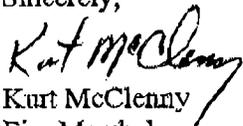

This letter is concerning our phone conversation yesterday regarding the minimum fire flow requirements for single family dwellings in the Clear Creek Crossing Subdivision.

I witnessed the fire flows for this subdivision in October of 2002. At that time the flow was 2576 gallons per minute @ 20 PSI. This allows single family homes up 9400 sq ft in size to be constructed without any restrictions.

If the contractors or home owners want to construct single family homes greater than 9400 sq ft., they can if the residence is provided with an approved automatic fire sprinkler system.

If you have any questions or need additional information please let me know.

Sincerely,

Kurt McClenny
Fire Marshal
