Comment_description: I am very upset that United Water is trying to raise their rates again. Why is it that they have to charge so much for water when my daughter lives just off of Cole and Northview and has a different water company and pays such low rates compared to what United Water charges. If one water district can keep their rates down maybe United Water needs better management to maintain their rates? It is terrible that utility companies now can charge a fee just to allow us the privledge to have water come into our home. Then on top of that we have to pay for water usage. The same holds true for other public utilities that charge a flat fee and then usage chagres on top of that. I think that maybe someone needs to investigate United Water's books before allowing a rate increase again! The should have to explain their reasons and compare other water districts charges within the city!
